From the Lodge to the Lighthouse
We're striving for a healthier Hyde

Acknowledgements

The Community Health Needs Assessment (CHNA) process requires significant dedication from those community members and organizations who are committed to identifying and addressing health problems within our communities to improve the quality of life for our residents. It is essential that the CHNA team involve people who have significant influence in the county, as well as the people most affected by health issues. People from throughout the county must be mobilized during this process, therefore a broad representation of county residents, agencies, and organizations were invited to be a part of this process.

Executive Summary

Hyde County is pleased to present its 2019 Community Health Needs Assessment (CHNA). This report provides an overview of the methods and process used to identify and prioritize significant health needs in Hyde County. This document serves as the 2019 CHNA for Vidant Beaufort Hospital and the 2018 CHNA for Hyde County Health Department.

Service Area

The service area for this report is defined as the geographical boundary of Hyde County, North Carolina. Hyde County is located along the coastal area of the state and has an area of 1,424 square miles, of which 613 square miles is land and 811 square miles is water.

Methods for Identifying Community Health Needs

Secondary Data

Secondary data used for this assessment were collected and analyzed from Conduent HCI's community indicator database. The database, maintained by researchers and analysts at Conduent HCI, includes over 100 community indicators from various state and national data sources such as the North Carolina Department of Health and Human Services, the Centers for Disease Control and Prevention and the American Community Survey. See Appendix B for a full list of data sources used.

Indicator values for Hyde County were compared to North Carolina counties and U.S. counties to identify relative need. Other considerations in weighing relative areas of need included comparisons to North Carolina state values, comparisons to national values, trends over time, Healthy People 2020 targets and Healthy North Carolina 2020 targets. Based on these seven different comparisons, indicators were systematically ranked from high to low need. For a detailed methodology of the analytic methods used to rank secondary data indicators see Appendix B.

Primary Data

The primary data used in this assessment consisted of (1) a community survey distributed through online and paper submissions and (2) focus group discussions. Almost 300 Hyde County residents contributed their input on the community's health and health-related needs, barriers, and opportunities, with special focus on the needs of vulnerable and underserved populations.

See Appendix C for all primary data collection tools used in this assessment.

Summary of Findings

The CHNA findings are drawn from an analysis of an extensive set of secondary data (over 100 indicators from national and state data sources) and in-depth primary data from community leaders, health and non-health professionals who serve the community at large, vulnerable populations, and populations with unmet health needs. Through a synthesis of the primary and

secondary data the significant health needs were determined for Hyde County and are displayed in
Table **1**.

Table 1. Significant Health Needs

Exercise, Nutrition & Weight
Social Environment
Substance Abuse

Selected Priority Areas

As explained later in this report, Hyde County has selected the following priority areas:

- Healthy Living

- Access to Mental Health Services

- Substance use / abuse

Conclusion

This report describes the process and findings of a comprehensive health needs assessment for the residents of Hyde County, North Carolina. The prioritization of the identified significant health needs will guide community health improvement efforts of Hyde County. Following this process, Hyde County will outline how they plan to address the prioritized health needs in their Community Health Improvement Plans.

Introduction

Hyde County is pleased to present the 2019 Community Health Needs Assessment, which provides an overview of the significant community health needs identified in Hyde County, North Carolina.

The goal of this report is to offer a meaningful understanding of the most pressing health needs across Hyde County, as well as to guide planning efforts to address those needs. Special attention has been given to the needs of vulnerable populations, unmet health needs or gaps in services, and input gathered from the community.

Findings from this report will be used to identify, develop and target initiatives to provide and connect community members with resources to improve the health challenges in their communities.

The 2019 Hyde County Community Health Needs Assessment was developed through a partnership between the Hyde County Health Department, Vidant Beaufort Hospital, Health ENC and Conduent Healthy Communities Institute, with Vidant Health serving as the fiscal sponsor.

About Health ENC

Initiated in 2015 by the Office of Health Access at the Brody School of Medicine at East Carolina University, Health ENC grew out of conversations with health care leaders about improving the community health needs assessment (CHNA) process in eastern North Carolina. Health ENC, now a program of the Foundation for Health Leadership and Innovation (FHLI), coordinates a regional CHNA in 33 counties of eastern North Carolina. In addition, the Health ENC Program Manager works to build coalitions and partnerships that will address health issues identified through the regional CHNA process.

As part of the Affordable Care Act, not for profit and government hospitals are required to conduct CHNAs every three years. Similarly, local health departments in North Carolina are required by the Division of Public Health (DPH) in the NC Department of Health and Human Services (DHHS) to conduct periodic community health assessments as well. Local health departments have been required to submit their community health needs assessments once every four years. The particular year CHNA submissions are made by hospitals within a three-year cycle or by local health departments within a four-year cycle is not uniform across the state or region.

Additionally, although local health departments and hospitals have guidance from their respective oversight authorities on how to conduct and report the results of their CHNAs, that guidance allows for wide variations in the execution of these reports. The methodologies, specific data items gathered, the interpretation of the data as well as the general approach and scope of one CHNA may have little resemblance to a CHNA in another jurisdiction or conducted by another organization.

For these reasons, health care leaders across eastern North Carolina have partnered to standardize the CHNA process for health departments and hospitals in the region. This effort will also sync all participant organizations on to the same assessment cycle. Combining efforts of local health departments and hospitals in a regional CHNA will ultimately lead to an improvement in the quality and utility of population health data, the ability to compare and contrast information and interventions across geographic boundaries, and the reduction of costs for everyone involved, while maintaining local control and decision-making with regard to the selection of health priorities and interventions chosen to address those priorities. Simultaneously, it will create opportunities for new and better ways to collaborate and partner with one another.

Upon receipt of generous funding support provided by The Duke Endowment, the Office of Health Access at ECU's Brody School of Medicine transferred administrative and operational responsibility for Health ENC to the Foundation for Health Leadership and Innovation in 2018. The project continues to be guided by a steering committee representing local health departments, hospitals and other stakeholders committed to improving the health of the people of eastern North Carolina.

Member Organizations

Health ENC is comprised of more than 40 organizations. Twenty-two hospitals, twenty-one health departments and two health districts participated in the regional CHNA.

Partner Organizations
- Foundation for Health Leadership & Innovation
- ECU Brody School of Medicine
- The Duke Endowment

Hospitals and Health Systems
- Cape Fear Valley Health (Cape Fear Valley Medical Center, Hoke Hospital and Bladen County Hospital)

- Wilson County Health Department

Steering Committee

Health ENC is advised by a Steering Committee whose membership is comprised of health department and hospital representatives participating in the regional CHNA, as well as other health care stakeholders from eastern North Carolina. The program manager oversees daily operations of the regional community health needs assessment and Health ENC.

Health ENC Program Manager
- Will Broughton, MA, MPH, CPH - Foundation for Health Leadership & Innovation

Health ENC Steering Committee Members
- Constance Hengel, RN, BSN, HNB-BC - Director, Community Programs and Development, UNC Lenoir Health Care
- James Madson, RN, MPH - Steering Committee Chair, Health Director, Beaufort County Health Department
- Battle Betts - Director, Albemarle Regional Health Services

- Caroline Doherty - Chief Development and Programs Officer, Roanoke Chowan Community Health Center
- Melissa Roupe, RN, MSN - Sr Administrator, Community Health Improvement, Vidant Health
- Davin Madden – Heath Director, Wayne County Health Department
- Angela Livingood – Pharmacy Manager, Pender Memorial Hospital
- Lorrie Basnight, MD, FAAP - Executive Director, Eastern AHEC, Associate Dean of CME, Brody School of Medicine
- Anne Thomas- President/CEO, Foundation for Health Leadership & Innovation

HealthENC.org

The Health ENC web platform, shown in Figure 1, is a resource for the community health needs assessment process in eastern North Carolina. The website serves as a "living" data platform, providing public access to indicator data that is continuously updated, easy to understand and includes comparisons for context. Much of the data used in this assessment is available on HealthENC.org and can be downloaded in multiple formats. Results of the 2018 Eastern North Carolina Community Health Survey can be downloaded by county or the entire Health ENC Region.

In addition to indicator data, the website serves as a repository for local county reports, funding opportunities, 2-1-1 resources and more. Health departments, hospital leaders and community health stakeholders in the 33-county region are invited to use the website as a tool for community assessment, strategic planning, identifying best practices for improvement, collaboration and advocacy.

Visit HealthENC.org to learn more.

Figure 1. Health ENC Online Data Platform

The Health ENC web platform is a resource for the community health needs assessment (CHNA) process in eastern North Carolina and is a program of the Foundation for Health Leadership and Innovation (FHLI). Health departments and hospital leaders in the 33 county region are invited to use the site as a tool for community assessment, strategic planning, identifying best practices for improvement, collaboration and advocacy.

Consultants

Health ENC commissioned Conduent Healthy Communities Institute (HCI) to assist with its Community Health Needs Assessment.

Conduent Healthy Communities Institute is a multi-disciplinary team of public health experts, including healthcare information technology veterans, academicians and former senior government officials, all committed to help health-influencing organizations be successful with their projects. Conduent HCI uses collaborative approaches to improve community health and provides web-based information systems to public health, hospital and community development sectors, to help them assess population health.

Conduent HCI works with clients across 38 states to drive improved community health outcomes by assessing needs, developing focused strategies, identifying appropriate intervention programs, establishing progress monitoring systems, and implementing performance evaluation processes. Working with diverse clients nationwide has contributed to Conduent HCI's national knowledge base of population health solutions. In addition, by engaging directly with clients and communities through the primary data collection process and final workshops, Conduent HCI works on behalf of our clients to build trust between and among organizations and their communities.

To learn more about Conduent HCI, please visit https://www.conduent.com/community-population-health/.

Evaluation of Progress Since Prior CHNA

The community health improvement process should be viewed as an iterative cycle. An important piece of that cycle is revisiting the progress made on priority health topics set forth in the preceding CHNA. By reviewing the actions taken to address priority health issues and evaluating the impact those actions have made in the community, it is possible to better target resources and efforts during the next round of the CHNA cycle.

A detailed table describing the strategies/action steps and indicators of improvement for each priority area can be found in Appendix A.

Community Feedback on Prior CHNA

The 2014/5 Hyde County Community Health Needs Assessment was made available to the public via Hyde County Health Department website and the Vidant Beaufort Hospital website. In addition, Vidant Beaufort Hospital completed an update to the Community Health Needs Assessment in 2016, which was also posted on the Vidant Beaufort Hospital website. Community members were invited to submit feedback and questions to the organization. No comments had been received on the preceding CHNAs at the time this report was written.

Methodology

Overview

Two types of data are analyzed for this Community Health Needs Assessment: secondary data and primary data. Secondary data is data that has been collected from other sources while primary data has been collected directly as a part of this report. Each type of data is analyzed using a unique methodology, and findings are organized by health topic areas. These findings are then synthesized for a comprehensive overview of the health needs in Hyde County.

Secondary Data Sources & Analysis

The main source of the secondary data used for this assessment is HealthENC.org[1], a web-based community health platform developed by Conduent Healthy Communities Institute. The HealthENC dashboard brings non-biased data, local resources, and a wealth of information in one accessible, user-friendly location. The secondary data analysis was conducted using Conduent HCI's data scoring tool, and the results are based on the 130 health and quality of life indicators that were queried on the HealthENC dashboard on July 18, 2018. The data are primarily derived from state and national public data sources. For each indicator on the platform, there exist several comparisons to assess Hyde County's status, including how Hyde County compares to other communities, whether health targets have been met, and the trend of the indicator value over time.

Conduent HCI's data scoring tool systematically summarizes multiple comparisons to rank indicators based on highest need (Figure 2). For each indicator, the Hyde County value is compared to a distribution of North Carolina and U.S. counties, state and national values, Healthy People 2020 targets, Healthy North Carolina 2020 targets, and the trend over the four most recent time periods of measure. Each indicator is then given a score based on the available comparisons. The scores range from 0 to 3, where 0 indicates the best outcome and 3 indicates the worst outcome. Availability of each type of comparison varies by indicator and is dependent upon the data source, comparability with data collected from other communities, and changes in methodology over time. The indicators are grouped into topic areas for a higher-level ranking of community health needs.

Figure 2. Secondary Data Scoring
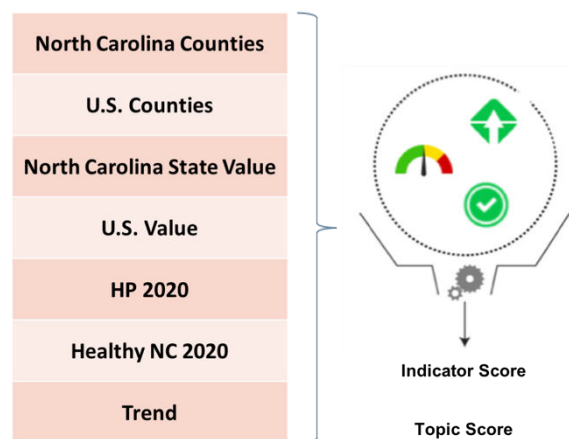

Please see Appendix B for further details on the secondary data scoring methodology.

Health and Quality of Life Topic Areas

Table 2 shows the health and quality of life topic areas into which indicators are categorized. These topic areas are broadly based on the Healthy People 2020 framework, with each topic area containing

---

[1] Health ENC is an online platform that provides access to health, economic and quality of life data, evidence-based programs, funding opportunities and other resources aimed at improving community health. The platform is publicly available and can be accessed at http://www.healthenc.org/.

multiple indicators. The five topic areas exhibiting the most significant need as evidenced by the secondary data analysis are included for in-depth exploration in the data findings. Four topic areas specific to population subgroups, including Children's Health, Men's Health, Women's Health, and Older Adults & Aging, include indicators spanning a variety of topics. If a particular subgroup receives a high topic score, it is not highlighted independently as one of the top 5 findings, but is discussed within the narrative as it relates to highly impacted populations. Three additional categories (County Health Rankings, Mortality Data, and Wellness & Lifestyle) are not considered for in-depth exploration, since all three are general categories that include indicators spanning a wide variety of topics. Topic areas with fewer than three indicators are considered to have data gaps and do not receive topic scores. These topics are indicated by an asterisk in Table 2.

<div align="center">Table 2. Health and Quality of Life Topic Areas</div>

Access to Health Services	Family Planning*	Prevention & Safety
Cancer	Food Safety*	Public Safety
Children's Health*	Heart Disease & Stroke	Respiratory Diseases
County Health Rankings	Immunizations & Infectious Diseases	Social Environment
Diabetes	Maternal, Fetal & Infant Health	Substance Abuse
Disabilities*	Men's Health*	Teen & Adolescent Health*
Economy	Mental Health & Mental Disorders	Transportation
Education	Mortality Data	Vision*
Environment	Older Adults & Aging	Wellness & Lifestyle
Environmental & Occupational Health	Other Chronic Diseases	Women's Health
Exercise, Nutrition, & Weight	Oral Health*	

*Topic area has fewer than 3 indicators and is considered a data gap. No topic score is provided.

Health ENC Region Comparison

When available, county-level data are compared to the state of North Carolina, as well as Health ENC Counties. The Health ENC region consists of 33 counties in eastern North Carolina participating in the regional CHNA: Beaufort, Bertie, Bladen, Camden, Carteret, Chowan, Cumberland, Currituck, Dare, Duplin, Edgecombe, Franklin, Gates, Greene, Halifax, Hertford, Hoke, Hyde, Johnston, Lenoir, Martin, Nash, Onslow, Pamlico, Pasquotank, Pender, Perquimans, Pitt, Sampson, Tyrrell, Washington, Wayne and Wilson. Values for the Health ENC region were calculated by aggregating data from these 33 counties.

Primary Data Collection & Analysis

To expand upon the information gathered from the secondary data, Health ENC Counties collected community input. Primary data used in this assessment consists of focus groups and both an English-language and Spanish-language community survey. All community input tools are available in Appendix C.

Community Survey

Community input was collected via a 57-question online and paper survey available in both English and Spanish. Survey Monkey was the tool used to distribute and collect responses for the community survey. Completed paper surveys were entered into the Survey Monkey tool.

The community survey was distributed across Health ENC's entire survey area from April 18, 2018 – June 30, 2018.

Survey Distribution
Surveys were distributed to various groups electronically and in paper format. A group of stakeholders, consisting of engaged community members and agency representatives, assisted in the primary data collection process by distributing paper surveys and slips containing the online survey link in every township. The survey link also was posted on various online outlets (e.g., Hyde County Government website, Hyde County Health Department social media and website, etc.) to broaden its accessibility. Additionally, paper surveys and the online survey link were promoted and distributed at an array of community events thoughout the county. Every effort was made to ensure that participants in the primary data process reflected the population of the county.

Table 3 summarizes the number of survey respondents. A total of 18,917 responses were collected across all 33 counties, with a survey completion rate of 86.5%, resulting in 16,358 complete responses across the entire survey area. A total of 285 responses were collected from Hyde County residents, with a survey completion rate of 82.8%, resulting in 236 complete responses from Hyde County. The survey analysis included in this CHNA report is based on complete responses.

Table 3. Survey Respondents

Service Area	Number of Respondents*		
	English Survey	Spanish Survey	Total
All Health ENC Counties	15,917	441	16,358
Hyde County	236	0	236

*Based on complete responses

Survey participants were asked a range of questions related - but not limited - to: what populations are most negatively affected by poor health outcomes in Hyde County, what their personal health challenges are, and what the most critical health needs are for Hyde County. The survey instrument is available in Appendix C.

Demographics of Survey Respondents
The following charts and graphs illustrate Hyde County demographics of the community survey respondents.

Among Hyde County survey participants, 42.3% of respondents were under the age of 50, with the highest concentration of respondents (13.6%) grouped into the 55-59 age group. The majority of respondents were female (82.8%), White (74.9%), spoke English at home (98.3%), and Not Hispanic (95.6%).

Survey respondents had varying degrees of education, with the highest share of respondents (24.7%) having only a high school degree and the next highest share of respondents (19.1%) having some college education but no college degree (Figure 3).

Figure 3. Education of Community Survey Respondents
As shown in Figure 4, more than half of the respondents were employed full-time, and the highest share of respondents (25%) had household annual incomes $50,000-$74,999 before taxes. The average household size was 2.5 individuals.

Figure 4. Employment Status of Community Survey Respondents
Figure 5 shows the health insurance coverage of community survey respondents. More than half of survey respondents have health insurance provided by their employer (53%) or Medicare (24.8%), while 11.5% have Medicaid and 6.8% have no health insurance of any kind.

Figure 5. Health Care Coverage of Community Survey Respondents
Key findings from select questions on the community survey are integrated into this report by theme or topic area, with an emphasis on the most significant needs as evidenced by both primary and secondary data. This approach is intended to offer a meaningful understanding of health needs. A summary of full survey results (all 57 questions) is available on HealthENC.org. Full results can be downloaded by county or for the entire Health ENC Region.

Focus Group Discussions

Another form of community input was collected through focus groups. Focus groups are carefully constructed dialogues that invite diverse groups of people to discuss important and pressing issues. Focus groups provide community members an opportunity to engage in productive learning and sharing sessions. Focus group discussions focused on community strengths, opportunities for improvement, existing resources, health needs, and possible solutions for improving the health of Hyde County. A list of questions asked at the focus groups is available in Appendix C.

The purpose of the focus groups for Health ENC's 2018 CHNA/CHA was to engage with a broad cross-section of individuals from each county, such as migrant worker groups, healthcare workers, or county employees, to name a few.

Conduent HCI consultants developed a Focus Group Guide and led training webinars for Health ENC members. Topics included facilitation techniques, moderator and note taker roles, as well as tips and

expectations for documenting focus group discussions. The list of focus group questions was reviewed and a transcript was provided for documentation purposes.

Focus Group participants included both engaged community members and agency/business representatives that were identified/recruited by Hyde County Health Department staff members representing each township in the county. Every effort was made to include a variety of participants of various races, ages, genders, socioeconomic statuses, geographic locations, etc. No incentives were provided to participants.

Three focus group discussions were completed within Hyde County between June 21, 2018 – July 12, 2018 with a total of 22 individuals. Participants included community agency representatives and community members. Table 4 shows the date, location, population type, and number of participants for each focus group.

<div align="center">Table 4. List of Focus Group Discussions</div>

Date Conducted	Focus Group Location	Population Type	Number of Participants
6/21/2018	Ocracoke Community Center	Community Agency Representatives, Various Ages and Backgrounds	8
6/28/2018	Engelhard Fire Department	Community Members & Agency Representatives, Various Ages and Backgrounds	8
7/12/2018	Hyde County Health Department (Swan Quarter)	Community Members & Agency Representatives, Various Ages and Backgrounds	6

Focus group transcripts were coded and analyzed by common theme. The frequency with which a topic area was discussed in the context of needs and concerns or barriers and challenges to achieving health was used to assess the relative importance of the need in the community. Key themes that emerged from the focus group discussions are integrated into this report by topic area, with an emphasis on the most significant needs as evidenced by both primary and secondary data. A deeper analysis of focus group findings is available on HealthENC.org.

Results of the focus group dialogues compliment the results from other forms of primary data collected (the community survey) and supports the findings from the secondary data scoring. By synthesizing the discussions that took place at the focus groups in tandem with the responses from the community survey, the primary data collection process for Wilson County is rich with involvement by a cross section of the community.

Data Considerations

Several limitations of the data should be considered when reviewing the findings presented in this report. Although the topics by which data are organized cover a wide range of health and health-related areas, within each topic there is a varying scope and depth of data availability. In some topics there is a

robust set of secondary data indicators, but in others there may be a limited number of indicators for which data is collected, or limited subpopulations covered by the indicators.

Data scores represent the relative community health need according to the secondary data that is available for each topic and should not be considered to be a comprehensive result on their own. In addition, these scores reflect what was found in the secondary data for the population as a whole, and do not factor in the health or socioeconomic need that is much greater for some subpopulations. In addition, many of the secondary data indicators included in the findings are collected by survey, and though methods are used to best represent the population at large, these measures are subject to instability—especially among smaller populations. The infant mortality rate indicator was corrected after the development of the content for this report. The values have been updated here and the impact was determined to be minimal to the analysis overall.

The disparities analysis, used to analyze the secondary data, is also limited by data availability. In some instances, data sources do not provide subpopulation data for some indicators, and for other indicators, values are only available for a select number of race/ethnic groups. Due to these limitations, it is not possible to draw conclusions about subpopulation disparities for all indicators.

The breadth of primary data findings is dependent on several factors. Focus group discussion findings were limited by which community members were invited to and able to attend focus group discussions, as well as language barriers during discussion for individuals whose native language is not English. Because the survey was a convenience sample survey, results are vulnerable to selection bias, making findings less generalizable for the population as whole.

Prioritization

Key stakeholders from Hyde County were convened on February 12, 2019 to review secondary and primary data from the CHNA data collection process. Following the data review and additional discussion, participants were guided through a nominal group technique where decision-making could be finalized. The nominal group technique was utilized to assure everyone's feedback and opinions were considered (as opposed to traditional voting, where the majority rules). During this process, some priorities were combined as appropriate to finalize the top health priorities for Hyde County. As a result of this process, Hyde County will work to develop action plans addressing these identified health priorities:

- Healthy Living

- Access to Mental Health Services

- Substance Use/ Abuse

Overview of Hyde County

About Hyde County

Hyde County has a total area of 1,424 square miles, 613 miles is land and 811 miles is water. Adjacent counties are Tyrrell, Dare, Carteret, Pamlico, Beaufort, and Washington County. There are two bodies of water in Hyde County the Pamlico Sound and the Atlantic Ocean. Hyde County is also home to five nationally protected areas. Attractions in Hyde County consist of the Ocracoke Lighthouse, waterfowl hunting, fishing and Eco-tourism.

Demographic Profile

The demographics of a community significantly impact its health profile. Population growth has an influence on the county's current and future needs. Specific population subgroups, including veterans and different age, gender, race and ethnic groups, may have unique needs and require varied approaches to health improvement efforts. The following section explores the demographic profile of Hyde County, North Carolina.

Population

According to the U.S. Census Bureau's 2016 population estimates, Hyde County has a population of 5,517 (Figure 6). The population of Hyde County has decreased since 2013.

Figure 6. Total Population (U.S. Census Bureau)
Figure 7 shows the population density of Hyde County compared to other counties in the Health ENC region. With a population density of 9.5 persons per square mile, Hyde County has the lowest population density of all Health ENC counties.

Figure 7. Population Density of Health ENC Counties (U.S. Census Bureau, 2010)
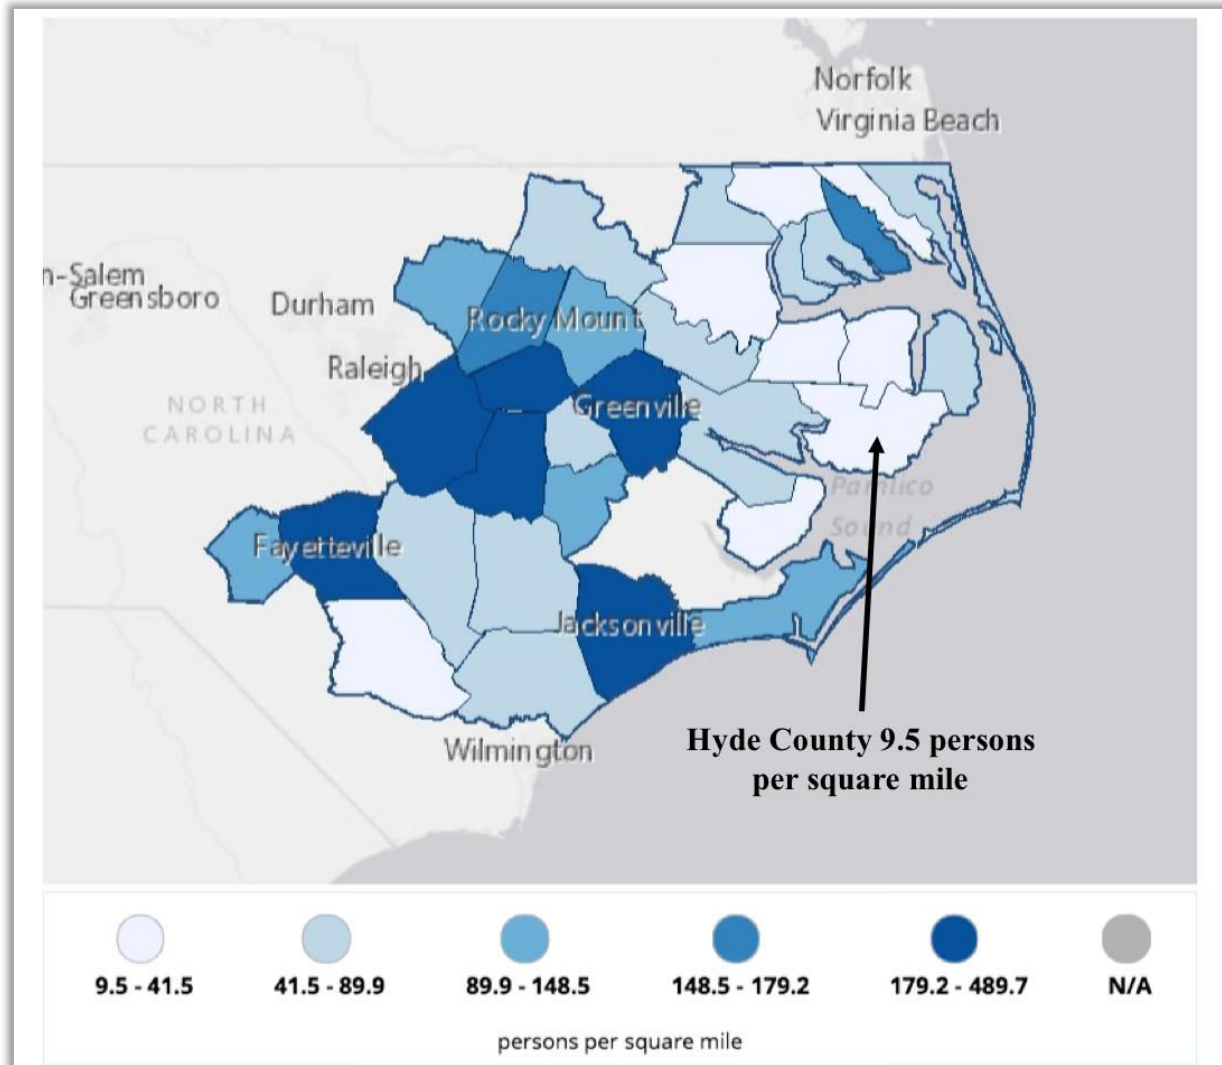

Age and Gender

Overall, Hyde County residents are older than residents of North Carolina and the Health ENC region. Figure 8 shows the Hyde County population by age group. The 35-44 age group contains the highest percent of the population at 13.5%, while the 45-54 age group contains the next highest percent of the population at 13.4%.

Figure 8. Population by Age (U.S. Census Bureau, 2016)
People 65 years and older comprise 18.7% of the Hyde County population, compared to 15.5% in North Carolina and 15.2% in the Health ENC counties (Figure 9).

Figure 9. Population 18+ and 65+ (U.S. Census Bureau, 2016)
Males comprise 55.3% of the population, whereas females comprise 44.7% of the population (Table 5). The median age for males is 40.8 years, whereas the median age for females is 48.5 years. Both are higher than the North Carolina median age (37.2 years for males and 40.1 years for females).

Table 5. Population by Gender and Age (U.S. Census Bureau, 2016)

	Percent of Total Population		Percent of Male Population		Percent of Female Population		Median Age (Years)	
	Male	Female	18+	65+	18+	65+	Male	Female
Hyde County	55.3%	44.7%	84.7%	15.5%	81.2%	22.7%	40.8	48.5
North Carolina	48.6%	51.4%	76.3%	13.9%	78.4%	17.0%	37.2	40.1
Health ENC Counties	49.2%	50.8%	75.8%	13.5%	77.5%	16.9%	N/A	N/A

Birth Rate

Birth rates are important measures of population health. The birth rate is usually the dominant factor in determining the rate of population growth; however, population growth is also driven by the age structure of the population (e.g., deaths), immigration and emigration. Figure 10 illustrates that the birth rate in Hyde County (7.1 live births per 1,000 population in 2016) is lower than the birth rate in North Carolina (12.0) and Health ENC counties (13.1).

Figure 10. Birth Rate (North Carolina State Center for Health Statistics)
Race/Ethnicity

The race and ethnicity composition of a population is important in planning for future community needs, particularly for schools, businesses, community centers, health care and child care. Race and ethnicity data are also useful for identifying and understanding disparities in housing, employment, income and poverty.

Figure 11 shows the racial and ethnic distribution of Hyde County compared to North Carolina and Health ENC counties. The first six categories (White, Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian & Other Pacific Islander and Multiracial) are racial groups and may include persons that identify as Hispanic or Latino. The seventh category (Hispanic or Latino) is an ethnic group and may include individuals that identify as any race.

The proportion of residents that identify as White in Hyde County is 67.5%, compared to 71.0% in North Carolina and 63.8% in Health ENC counties. Countywide, 29.2% of residents identify as Black or African American, compared to 22.2% in North Carolina and 30.7% in Health ENC counties. The Hispanic or Latino population comprises 8.9% of Hyde County, which is a slightly smaller proportion than the Hispanic or Latino population in North Carolina (9.2%) and Health ENC counties (9.6%).

Figure 11. Population by Race/Ethnicity (U.S. Census Bureau, 2016)
Tribal Distribution of Population

The U.S. Census Bureau collects population estimates for various American Indian and Alaska Native (AIAN) tribes. While population estimates of tribal data are not available at the county level, Table 6 shows the population estimates of eight tribal areas throughout the state of North Carolina.

Table 6. Named Tribes in North Carolina (American Community Survey, 2012-2016)

State Designated Tribal Statistical Area (SDTSA)	Total Population
Coharie SDTSA	62,160
Eastern Cherokee Reservation	9,613
Haliwa-Saponi SDTSA	8,700
Lumbee SDTSA	502,113
Meherrin SDTSA	7,782
Occaneechi-Saponi SDTSA	8,938
Sappony SDTSA	2,614
Waccamaw Siouan SDTSA	2,283

Military Population

Figure 12 shows the percent of the population 16 years of age and older in the military (armed forces). In 2012-2016, Hyde County has a smaller share of residents in the military (0.0%) compared to North Carolina (1.0%) and counties in the Health ENC region (4.0%). Figure 12 also shows the trend analysis of the military population over the 4 most recent measurement periods. Across four time periods, the military population in Hyde County has consistently remained at 0.0%, and is lower than in North Carolina and the Health ENC region.

Figure 12. Population in Military / Armed Forces (American Community Survey)
Veteran Population

The veteran population is given as a percent of the civilian population aged 18 years and older and this data is used for policy analyses, to develop programs, and to create budgets for veteran programs and facilities. Hyde County has a veteran population of 3.6% in 2012-2016, compared to 9.0% in North Carolina and 12.4% in Health ENC counties (Figure 13).

Figure 13 also shows that the veteran population of Hyde County, North Carolina, and the Health ENC region is decreasing across four time periods from 2009-2013 to 2012-2016.

Figure 13. Veteran Population (American Community Survey, 2012-2016)
Socioeconomic Profile

Social and economic factors are well known to be strong determinants of health outcomes – those with a low socioeconomic status are more likely to suffer from chronic conditions such as diabetes, obesity and cancer. Community health improvement efforts must determine which subpopulations are most in need in order to effectively focus services and interventions.

NC Department of Commerce Tier Designation

The North Carolina Department of Commerce annually ranks the state's 100 counties based on economic well-being and assigns each a Tier designation. The 40 most distressed counties are designated as Tier 1, the next 40 as Tier 2 and the 20 least distressed as Tier 3. Hyde County has been assigned a Tier 1 designation for 2018.

Income

Median household income reflects the relative affluence and prosperity of an area. Areas with higher median household incomes are likely to have a greater share of educated residents and lower unemployment rates. Figure 14 shows the median household income in Hyde County ($37,741), which is lower than the median household income in North Carolina ($48,256).

Figure 14. Median Household Income (American Community Survey, 2012-2016)
The median household income in Hyde County is similar to other counties in the Health ENC region (Figure 15).

Figure 15. Median Household Income of Health ENC Counties
(American Community Survey, 2012-2016)
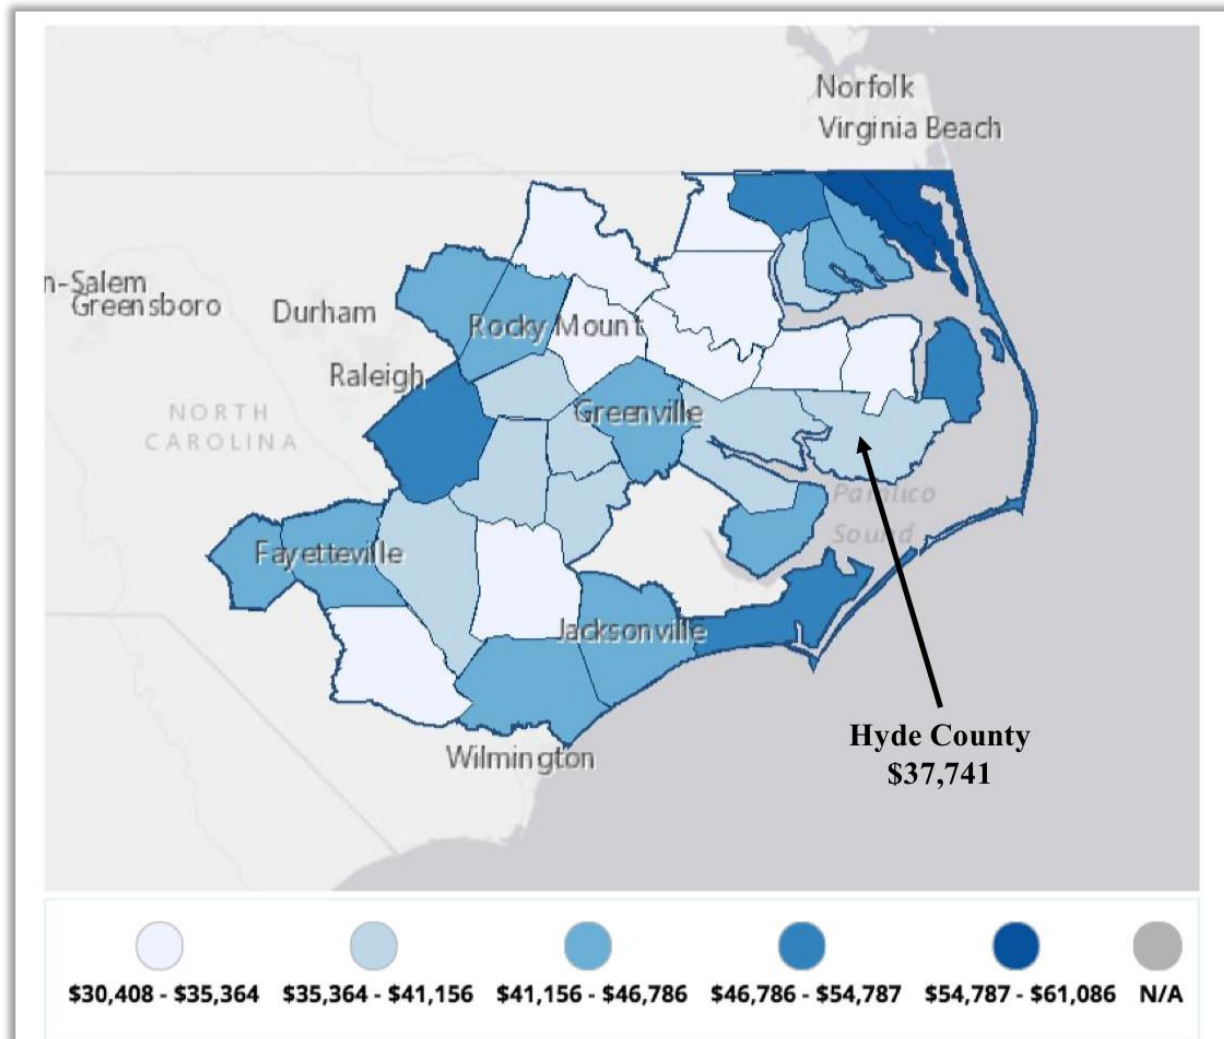

Within Hyde County, zip code 27885 has the lowest median household income ($31,686) while zip code 27960 has the highest median household income ($62,853) (Figure 16).

Figure 16. Median Household Income by Zip Code (American Community Survey, 2012-2016
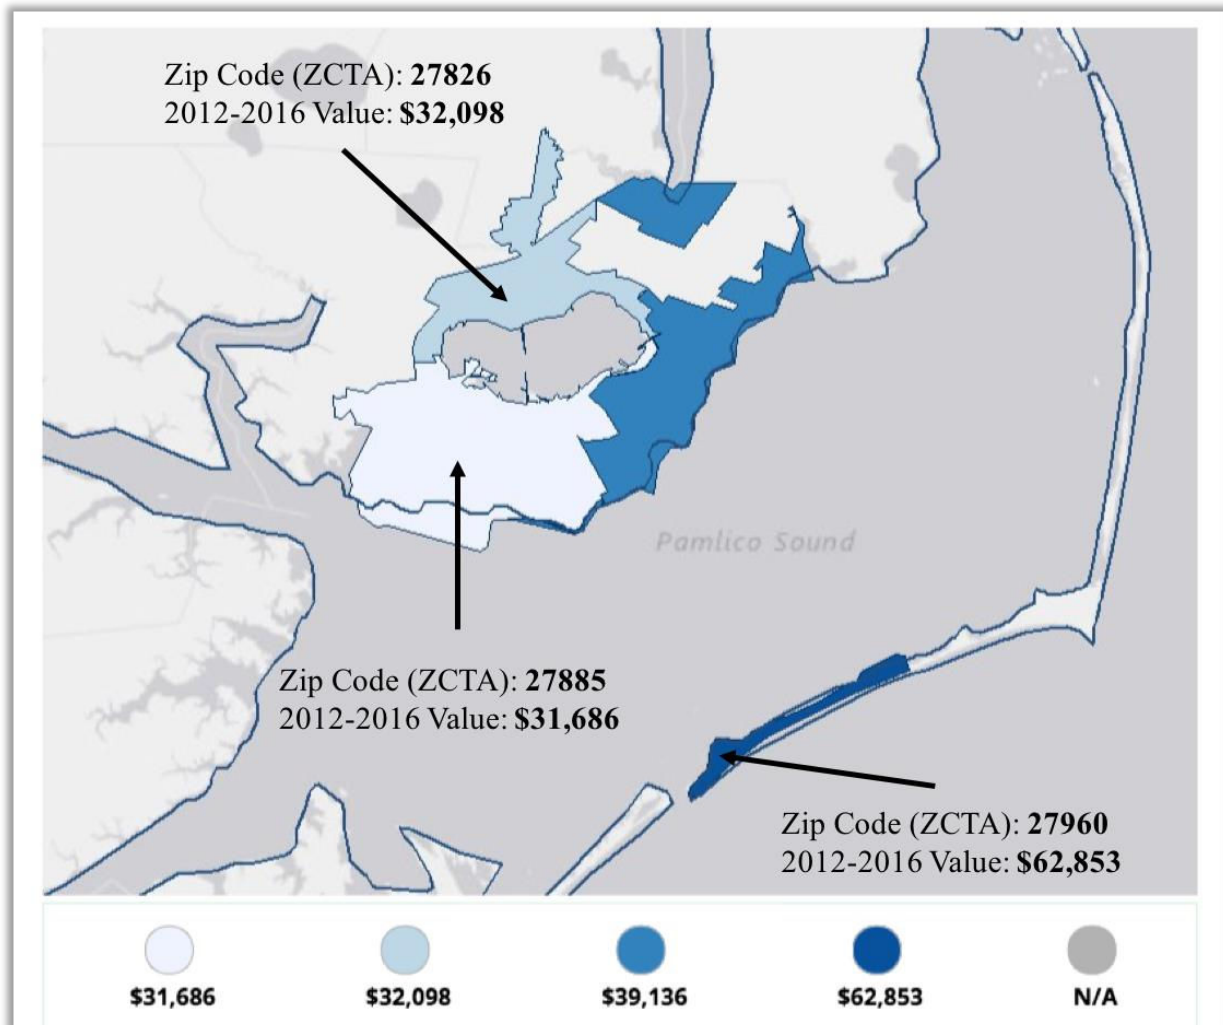

Poverty

Federal poverty thresholds are set every year by the Census Bureau and vary by size of family and ages of family members. A high poverty rate is both a cause and a consequence of poor economic conditions. Children in poverty are more likely to have physical health problems, behavioral problems and emotional problems. Seniors who live in poverty are an especially vulnerable group due to increased physical limitations, medical needs, and social isolation. Persons with a disability are more likely to live in poverty compared to the rest of the population. Without adequate income, individuals with disabilities may not be able to afford necessary expenses, such as rent or mortgage, utility bills, medical and dental care, and food.

As seen in Figure 17, 22.4% percent of the population in Hyde County lives below the poverty level, which is higher than the rate for North Carolina (16.8% of the population) and the Health ENC region (19.2%).

Figure 17. People Living Below Poverty Level (American Community Survey, 2012-2016)
As shown in Figure 18, the rate of children living below the poverty level is also higher for Hyde County (28.6%) when compared to North Carolina (23.9%) and Health ENC counties (27.6%).

Figure 18. Children Living Below Poverty Level (American Community Survey, 2012-2016)
As shown in Figure 19, the rate of older adults living below the poverty level is lower in Hyde County (2.1%) than in North Carolina (9.7%) and the Health ENC region (11.5%).

Figure 19. People 65+ Living Below Poverty Level (American Community Survey, 2012-2016)
As shown in Figure 20, the percent of disabled people living in poverty in Hyde County (33.1%) is higher than the rate for North Carolina (29.0%) and Health ENC counties (28.1%).

Figure 20. Persons with Disability Living in Poverty (American Community Survey, 2012-2016)
Housing

The average household size in Hyde County is 2.5 people per household, which is the same as the average household size in North Carolina.

High costs of homeownership with a mortgage can strain both homeowners and the local housing market. Figure 21 shows mortgaged owners median monthly household costs in the Health ENC region. In Hyde County, the median housing costs for homeowners with a mortgage is $975, which is lower than all but one county in the Health ENC region.

Figure 21. Mortgaged Owners Median Monthly Household Costs, Health ENC Counties (American Community Survey 2012-2016)
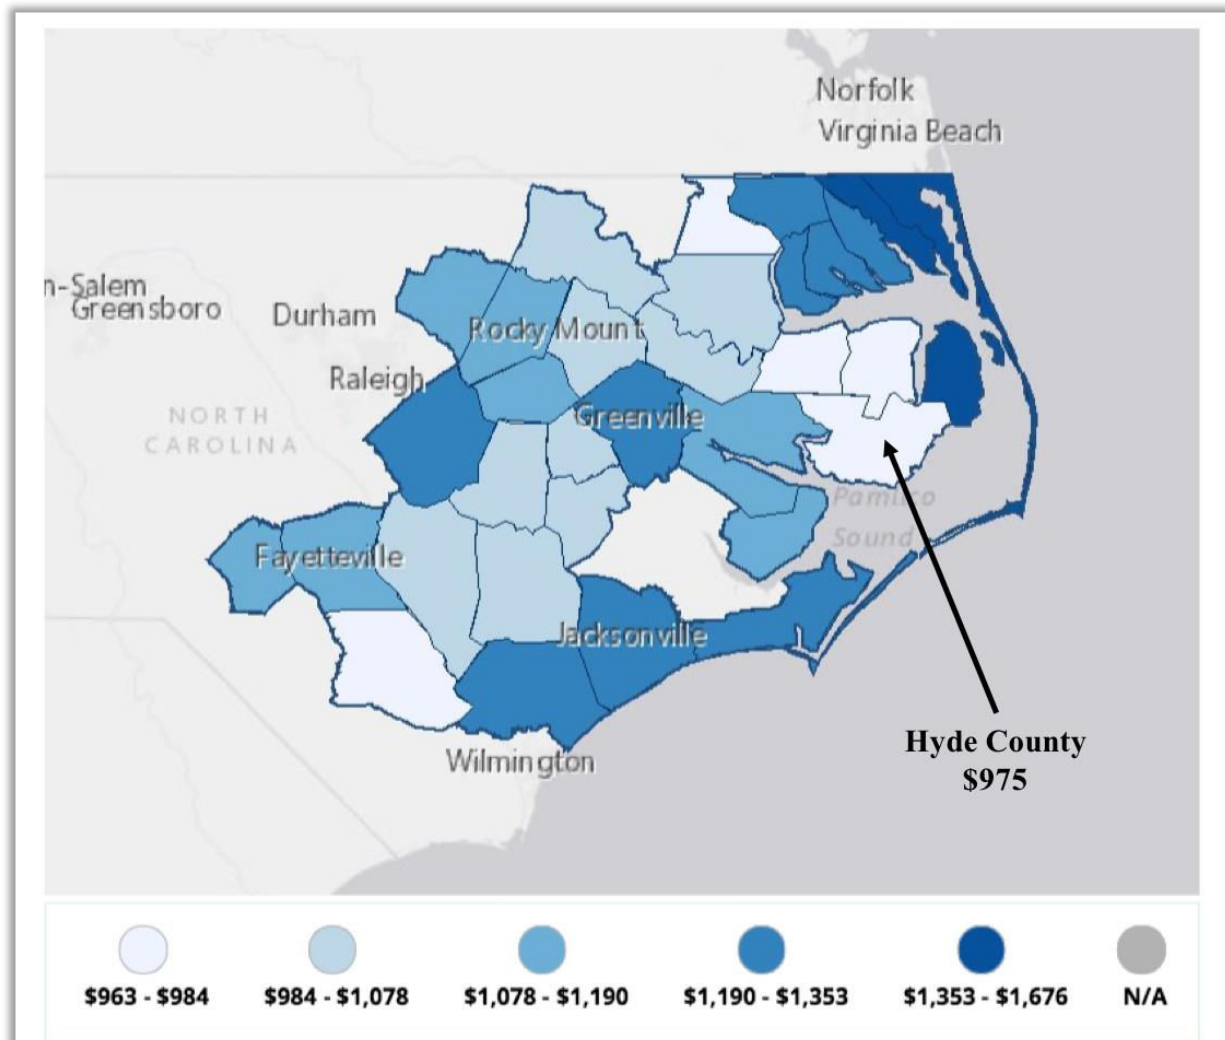

Safe and affordable housing is an essential component of healthy communities, and the effects of housing problems are widespread. Figure 22 shows the percent of households with at least one of the following problems: overcrowding, high housing costs, lack of kitchen, or lack of plumbing facilities. Countywide, 12.3% of households have severe housing problems, compared to 16.6% in North Carolina and 17.7% in Health ENC counties.

Figure 22. Severe Housing Problems (County Health Rankings, 2010-2014)
Food Insecurity

The Supplemental Nutrition Assistance Program (SNAP) is a federal assistance program that provides low-income families with electronic benefit transfers (EBTs) that can be used to purchase food. The goal of the program is to increase food security and reduce hunger by increasing access to nutritious food.

Figure 23 shows the percent of households with children that participate in SNAP. The rate for Hyde County, 44.0%, is lower than the state value of 52.6% and the Health ENC region value of 51.5%.

Figure 23. Households with Children Receiving SNAP (American Community Survey, 2012-2016)
Employment

According to North Carolina Commerce data from 2017, the top five largest employers in Hyde County are:
- Hyde County Board of Education: 100-249 employees
- NC Department of Public Safety: 100-249 employees
- County of Hyde: 100-249 employees
- Williams Seafood Inc.: 100-249 employees

SocioNeeds Index

Conduent Healthy Communities Institute developed the SocioNeeds Index® to easily compare multiple socioeconomic factors across geographies. This index incorporates estimates for six different social and economic determinants of health – income, poverty, unemployment, occupation, educational attainment, and linguistic barriers – that are associated with poor health outcomes including preventable hospitalizations and premature death.

Zip codes within Hyde County are assigned an index value from 0 (low need) to 100 (high need), based on how those zip codes compare to others in the U.S. Within Hyde County, the zip codes are then ranked from 1 (low need) to 5 (high need) to identify the relative level of need. Zip codes with populations under 300 persons are excluded. Zip code 27824, with an index value of 92.8, has the highest level of socioeconomic need within Hyde County. This is illustrated in Figure 24. Index values and the relative ranking of each zip code within Hyde County are provided in Table 7.

Figure 24. SocioNeeds Index® (Conduent Healthy Communities Institute, 2018)
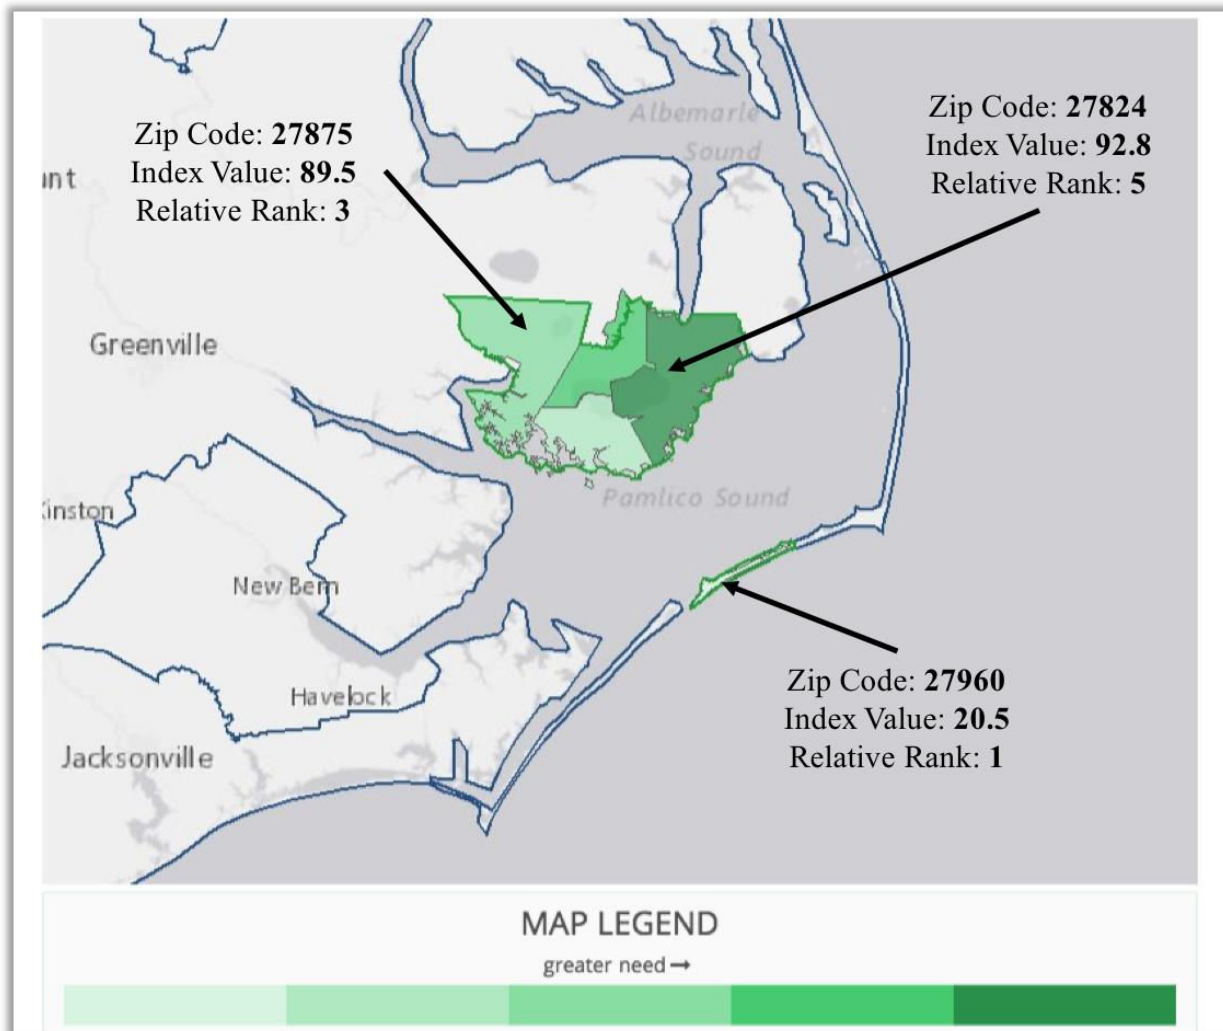

Table 7. SocioNeeds Index® (Conduent Healthy Communities Institute, 2018)

Zip Code	Index Value	Relative Rank
27824	92.8	5
27826	90.8	4
27875	89.5	3
27885	86.8	2
27960	20.5	1

Source: http://www.healthenc.org/socioneeds

Understanding where there are communities with high socioeconomic need is critical to forming prevention and outreach activities.

Educational Profile

Hyde County has the following public schools:

- Elementary Schools-1
  - Mattamuskeet Elementary
- K-12 School-1
  - Ocracoke School
- Early College High School-1
  - Mattamuskeet Early College High School

Hyde County also has 1 private schools
  - Hope Mennonite School: 1st-10th grade

There is no access to a University or Community College in Hyde County. The closest Community Colleges are Beaufort Community and College of the Albemarle.

Educational Attainment

Graduating from high school is an important personal achievement and is essential for an individual's social and economic advancement. Graduation rates can also be an important indicator of the performance of an educational system. Having a bachelor's degree opens up career opportunities in a variety of fields and is often a prerequisite for higher-paying jobs.

Countywide, the percent of residents 25 or older with a high school degree or higher (80.6%) is lower than the state value (86.3%) and the Health ENC region (84.7%) (Figure 25). Higher educational attainment in Hyde County is also lower when compared to the state and Health ENC region. While 29.0% of residents 25 and older have a bachelor's degree or higher in North Carolina, the rate drops to 19.9% in Health ENC counties and 8.7% in Hyde County (Figure 25).

Figure 25. People 25+ with a High School Degree or Higher and Bachelor's Degree or Higher (American Community Survey, 2012-2016)
In some areas of the county, including zip code 27824, which has a high poverty rate and high socioeconomic need (SocioNeeds Index®), the high school degree attainment rate is below 75% (Figure 26).

Figure 26. People 25+ with a High School Degree or Higher by Zip Code (American Community Survey, 2012-2016)
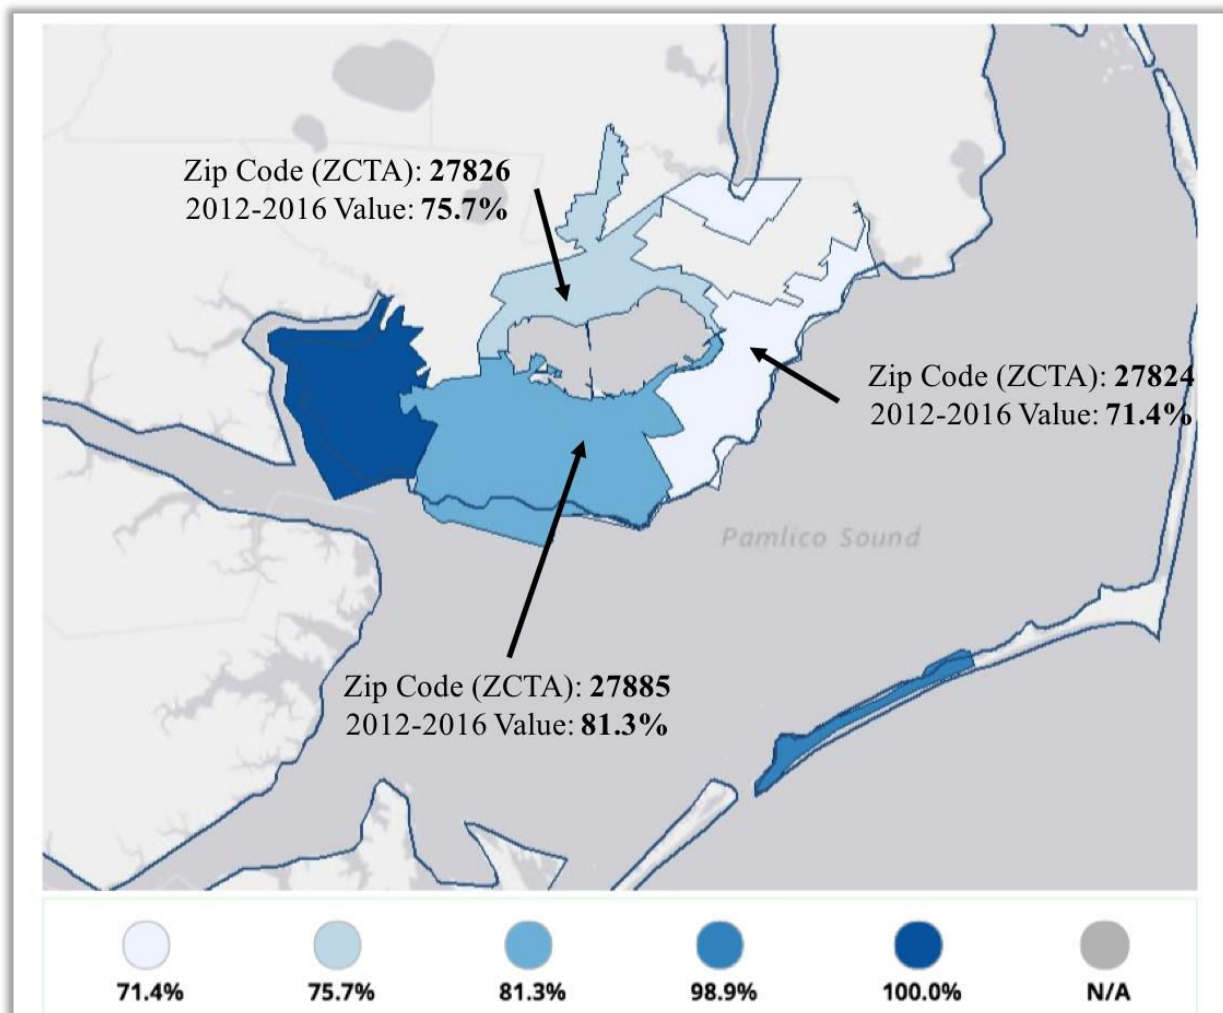

High School Dropouts

High school dropouts earn less income than high school and college graduates and are more likely to be unemployed. High school dropouts are generally less healthy and require more medical care. Further, high school dropout rates are linked with heightened criminal activity and incarceration rates, influencing a community's economic, social, and civic health.

Hyde County's high school dropout rate, given as a percent of high school students in Figure 27, is 2.2% in 2016-2017, which is slightly lower than the rate in North Carolina (2.3%) and the Health ENC region (2.4%).

Figure 27. High School Dropout Rate (North Carolina Department of Public Instruction)
High School Suspension Rate

High school suspension is a form of discipline in which a student is temporarily removed from a classroom and/or school due to a violation of school conduct or code. Higher rates of suspension can be related to high rates of antisocial or delinquent behaviors, which may further contribute to potential future involvement in the juvenile justice system. Additionally, schools with higher suspension rates have higher rates of law or board of education violations and generally spend more money per student.

As shown in Figure 28, Hyde County's rate of high school suspension (25.0 suspensions per 100 students) is higher than North Carolina's rate (18.2), but lower than the regional rate (25.5) in 2016-2017.

Figure 28. High School Suspension Rate (North Carolina Department of Public Instruction)
Environmental Profile

Air Quality

Nationally, outdoor air quality monitoring is the responsibility of the Environmental Protection Agency (EPA). In NC, the agency responsible for monitoring air quality is the Division of Air Quality (DAQ) in the NC Department of Environment and Natural Resources (NCDENR).

The impact of air pollutants in the environment is described on the basis of emissions, exposure, and health risks. A useful measure that combines these three parameters is the EPA's *Air Quality Index* (AQI). The EPA monitors and catalogues AQI measurements at the county level, but not in all counties. According to the EPA, air quality was measured in Hyde County on 76 days in 2018. Of these days, 75 had "good" air quality and one had "moderate" air quality. On each of the monitored days small particulate matter ($PM_{2.5}$) was present at the level of pollutant (21).

Water Quality
Drinking Water Systems
The EPA is responsible for monitoring the safety of drinking water and water system violations of the federal Safe Drinking Water Act (SDWA). The EPA's Safe Drinking Water Information System (SDWIS) contains information about public water systems and their violations of EPA's drinking water regulations, as reported to EPA by the states. These regulations establish maximum contaminant levels, treatment techniques, and monitoring and reporting requirements to ensure that water systems provide safe water to their customers (21).

As of April 10, 2019, SDWIS listed three active water systems in Hyde County. Two were *community water systems* that together served 6,156 people. A community water system is one that serves at least 15 service connections used by year-round residents or regularly serves 25 year-round residents. This category includes municipalities, subdivisions and mobile home parks.

In addition to two community water systems, there is also one *transient, non-community water system* in Hyde County, located at the Hatteras Ferry South Dock operated by the NC Department of Transportation. Water systems in this category are those that do not consistently serve the same people and include rest stops, campgrounds and gas stations.

The EPA also records in SDWIS violations of drinking water standards reported to it by states. It records violations as either *health-based* (contaminants exceeding safety standards or water not properly treated) or *monitoring- or reporting-based* (system failed to complete all samples or sample in a timely manner, or had another non-health related violation). There were no health violations cited for the water systems in Hyde County over the period cited; only a Lead Consumer Notice violation for the Ocracoke Sanitary District (22).

Solid Waste
Solid Waste Disposal
The solid waste disposal trend in Hyde County is moving in the *wrong* direction. In FY2017-18, Hyde County managed 5,951 tons of municipal solid waste (MSW) for a rate of 1.09 tons per capita. This tonnage represented an *increase* of 118% from the per capita rate (0.50 tons per capita) for FY1991-92

(the period customarily used for the base rate). During the same 2017-18 period, the overall state per capita solid waste management rate was 6% *more* than the FY1991-92 base per capita rate (22).

All of Hyde County's solid waste of record is transferred to or transported directly to landfills *outside* the county (22).

Transportation Profile

Public transportation offers mobility, particularly to people without cars. Transit can help bridge the spatial divide between people and jobs, services, and training opportunities. Public transportation also reduces fuel consumption, minimizes air pollution, and relieves traffic congestion. Walking to work helps protect the environment, while also providing the benefit of daily exercise.

Countywide, 6.6% of residents walk to work, compared to the state value of 1.8% and the regional value of 2.4%. Public transportation is rare in Hyde County, with an estimated 0.6% of residents commuting by public transportation, compared to the state value of 1.1% and the regional value of 0.4% (Figure 29). In Hyde County, 69.6% of workers 16 and older drive alone to work, compared to 81.1% in North Carolina and 81.4% in Health ENC counties (Figure 30).

Figure 29. Mode of Commuting to Work (American Community Survey, 2012-2016)
Figure 30. Workers who Drive Alone to Work (American Community Survey, 2012-2016)
Crime and Safety

Violent Crime and Property Crime

Both violent crime and property crime are used as indicators of a community's crime and safety. Violence negatively impacts communities by reducing productivity, decreasing property values and disrupting social services. Violent crime includes four offenses: murder and non-negligent manslaughter, rape, robbery, and aggravated assault. Property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson.

Figure 31 shows the violent crime rate in North Carolina. The rate has increased from 333.0 violent crimes per 100,000 persons in 2014 to 374.9 violent crimes per 100,000 persons in 2016. Values for Hyde County were not available over the same measurement period.

Figure 31. Violent Crime Rate (North Carolina Department of Justice)
The property crime rate in Hyde County (0.0 per 100,000 people in 2016) is lower than the state value (2,779.7 per 100,000 people) (Figure 32). Over the past four measurement periods, the property crime rate in Hyde County has consistently remained at 0.0 per 100,000 persons.

Figure 32. Property Crime Rate (North Carolina Department of Justice)

53
Juvenile Crime

Youth who commit a crime may not gain the educational credentials necessary to secure employment and succeed later in life. Negative peer influences, history of abuse/neglect, mental health issues, and significant family problems increase the risk of juvenile arrest. The juvenile justice system aims to reduce juvenile delinquency through prevention, intervention, and treatment services.

Figure 33 shows the juvenile undisciplined rate per 1,000 youth ages 6-17 years old. The undisciplined rate describes juveniles who are unlawfully absent from school, regularly disobedient and beyond disciplinary control of the parent/guardian, are regularly found where it is unlawful for juveniles to be, or have run away from home for more than 24 hours. The 2017 juvenile undisciplined rate in Hyde County (0.0) is lower than the rate in North Carolina (1.5) and the Health ENC region (1.1).

Figure 33. Juvenile Undisciplined Rate (North Carolina Department of Public Safety)
Figure 34 shows the juvenile delinquent rate, or juvenile crime rate, per 1,000 youth ages 6-15 years old. The 2017 juvenile delinquent rate in Hyde County (3.4) is lower than the rate in North Carolina (19.6) and the Health ENC region (22.8). Countywide, the juvenile crime rate has decreased noticeably since 2014.

Figure 34. Juvenile Delinquent Rate (North Carolina Department of Public Safety)
Child Abuse

Child abuse includes physical, sexual and emotional abuse. All types of child abuse and neglect can have long lasting effects throughout life, damaging a child's sense of self, ability to have healthy relationships, and ability to function at home, at work, and at school. Figure 35 shows the child abuse rate per 1,000 population aged 0-18. The child abuse rate in Hyde County has decreased since 2014. The 2017 child abuse rate in Hyde County (0.00 per 1,000 population) is lower than the rate in North Carolina (0.22) and the Health ENC region (0.28).

Figure 35. Child Abuse Rate
(Management Assistance for Child Welfare, Work First, and Food & Nutrition Services in North Carolina & University of North Carolina at Chapel Hill Jordan Institute for Families)
Incarceration

According to the U.S. Bureau of Justice Statistics, approximately one out of 100 adults in the U.S. are in jail or prison. Conditions in jails and prisons can lead to an increased risk of infectious diseases such as tuberculosis and hepatitis C, as well as assault from other inmates. After incarceration, individuals are likely to face a variety of social issues such as employment discrimination, disruption of family relationships and recidivism.

Figure 36 shows the incarceration rate per 1,000 population. The 2017 incarceration rate in Hyde County (428.3 per 1,000 population) is higher than the rate in North Carolina (276.7) and the Health ENC region (232.6).

Figure 36. Incarceration Rate (North Carolina Department of Public Safety)
Access to Healthcare, Insurance and Health Resources Information

Health Insurance

Medical costs in the United States are very high. People without health insurance may not be able to afford medical treatment or prescription drugs. They are also less likely to get routine checkups and screenings, so if they do become ill they may not seek treatment until the condition is more advanced, and therefore more difficult and costly to treat.

Figure 37 shows the percent of people aged 0-64 years old that have any type of health insurance coverage. The rate for Hyde County, 85.7%, is slightly lower than the rate for North Carolina (87.8%) and the Health ENC region (87.2%). Countywide, 14.3% of the population is uninsured.

Figure 37. Persons with Health Insurance (Small Area Health Insurance Estimates, 2016)
Figure 38 shows the percent of the population only receiving health insurance through Medicaid, Medicare, or military healthcare (TRICARE). Hyde County has a higher percent of people receiving Medicaid (27.1%) than North Carolina (18.2%) and Health ENC counties (21.7%). The percent of people receiving Medicare is lower in Hyde County (3.2%) when compared to North Carolina (4.8%) and Health ENC counties (4.5%). The percent of people receiving military health insurance is also lower in Hyde County (0.0%) than in North Carolina (2.1%) and Health ENC counties (6.6%).

Figure 38. Persons Only Receiving Health Insurance through Medicaid, Medicare or Military Healthcare (American Community Survey, 2012-2016)
Civic Activity

Political Activity

Exercising the right to vote allows a community to choose elected officials and hold them accountable. Voting ensures that all citizens have the opportunity to voice their opinions on issues such as the use of tax dollars, civil rights and foreign policy. By voting, individuals shape their communities and influence the next generation of society. A high level of voter turnout indicates that citizens are involved and interested in who represents them in the political system.

Figure 39 shows the voting age population, or percent of the population aged 18 years and older. Hyde County has a higher percent of residents of voting age (83.1%) than North Carolina (77.3%) and Health ENC counties (76.7%).

Figure 39. Voting Age Population (American Community Survey, 2012-2016)
Figure 40 shows the percent of registered voters who voted in the last presidential election. The rate in Hyde County was 67.6%, which is similar to the state value (67.7%) and higher than the regional value (64.3%).

Figure 40. Voter Turnout in the Last Presidential Election (North Carolina State Board of Elections, 2016)
Findings

Secondary Data Scoring Results

Table 8 shows the data scoring results for Hyde County by topic area. Topics with higher scores indicate greater need. Substance Abuse is the poorest performing health topic for Hyde County, followed by Diabetes, Social Environment, Exercise, Nutrition & Weight and Economy.

Table 8. Secondary Data Scoring Results by Topic Area

Health Topic	Score
Substance Abuse	2.11
Diabetes	1.88
Social Environment	1.83
Exercise, Nutrition & Weight	1.79
Economy	1.77

*See Appendix B for additional details on the indicators within each topic area

Primary Data

Community Survey

Figure 41 shows the list of community issues that were ranked by residents as most affecting the quality of life in Hyde County. Low income/poverty was the most frequently selected issue and was ranked by 51.8% of survey respondents, followed by drugs/substance abuse. Less than 1% of survey respondents selected domestic violence, theft, elder abuse, child abuse, violent crime or rape/sexual assault as issues most affecting the quality of life in Hyde County.

Figure 41. Top Quality of Life Issues, as Ranked by Survey Respondents
Figure 42 displays the level of agreement among Hyde County residents in response to nine statements about their community. More than half of survey respondents agreed or strongly agreed that the county

is a safe place to live, is a good place to grow old, and is a good place to raise children. More than half of survey respondents disagreed or strongly disagreed that the county has plenty of economic opportunity and has good parks and recreation facilities.

Figure 42. Level of Agreement Among Hyde County Residents in Response to Nine Statements about their Community
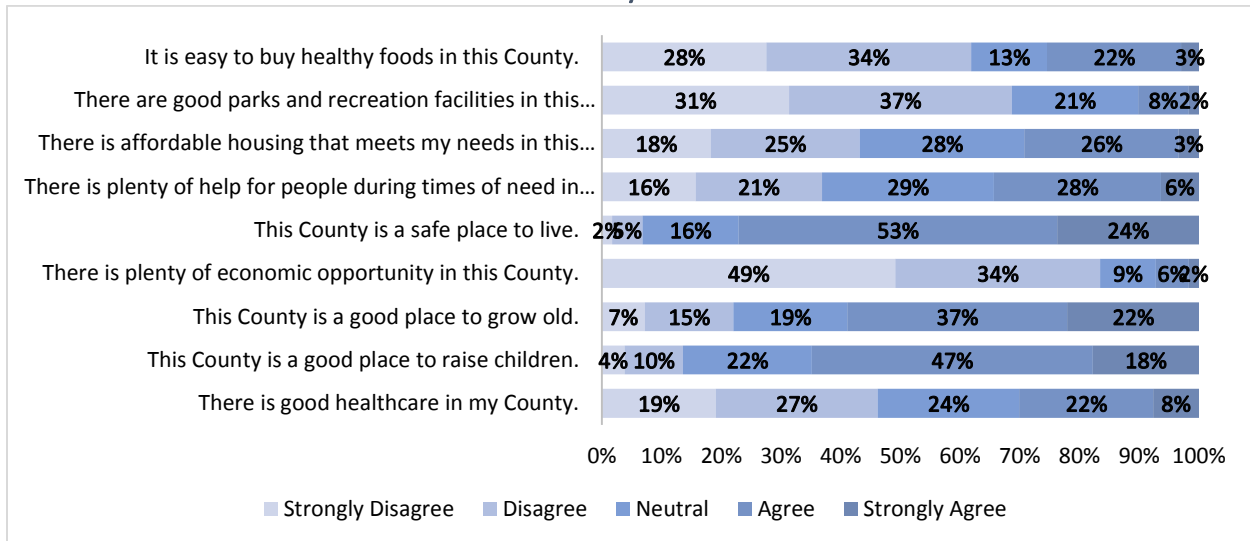

Figure 43 shows the list of services that were ranked by residents as needing the most improvement in Hyde County. Availability of employment was the most frequently selected issue, followed by higher paying employment, positive teen activities, and number of health care providers.

Figure 43. Services Needing the Most Improvement, as Ranked by Survey Respondents
Focus Group Discussions

Table 9 shows the focus group results for Hyde County by topic area or code. Focus Group transcript text were analyzed by the Conduent HCI team using a list of codes that closely mirror the health and quality of life topics used in the data scoring and community survey processes. Text was grouped by coded excerpts, or quotes, and quantified to identify areas of the highest need per the focus group participants. All excerpts/quotes were also categorized as a strength or a barrier/need based on the context in which the participant mentioned the topic. Topics with higher frequency and mentioned in the context of needs/concerns or barriers/challenges suggests greater need in the community. Topics with a frequency more than 15 are included in the overall list of significant health needs.

Table 9. Focus Group Results by Topic Area

Topic Area (Code)	Frequency
Access to Health Services	17
Exercise, Nutrition, & Weight	16
Environment	13
Children's Health	8
Mental Health & Mental Disorders	8
Substance Abuse	8

Data Synthesis

All forms of data have strengths and limitations. In order to gain a comprehensive understanding of the significant health needs for Hyde County, findings from the secondary data, community survey and focus group discussions were compared and analyzed for areas of overlap. The top needs from each data source were identified using the criteria displayed in Table 10.

Table 10. Criteria for Identifying the Top Needs from each Data Source

Data Source	Criteria for Top Need
Secondary Data	Topics receiving highest data score
Community Survey	Community issues ranked by survey respondents as most affecting the quality of life*
Focus Group Discussions	Topics discussed most frequently by participants in context of needs/concerns or barriers/challenges to achieving health

*Community Survey Q4: Please look at this list of community issues. In your opinion, which one issue most affects the quality of life in this County?

The top 5 needs from each data source were incorporated into a Venn Diagram. Community issues ranked by survey respondents were categorized to align with the health and quality of life topic areas displayed in Table 2.

Figure 45 displays the top needs from each data source in the Venn diagram.
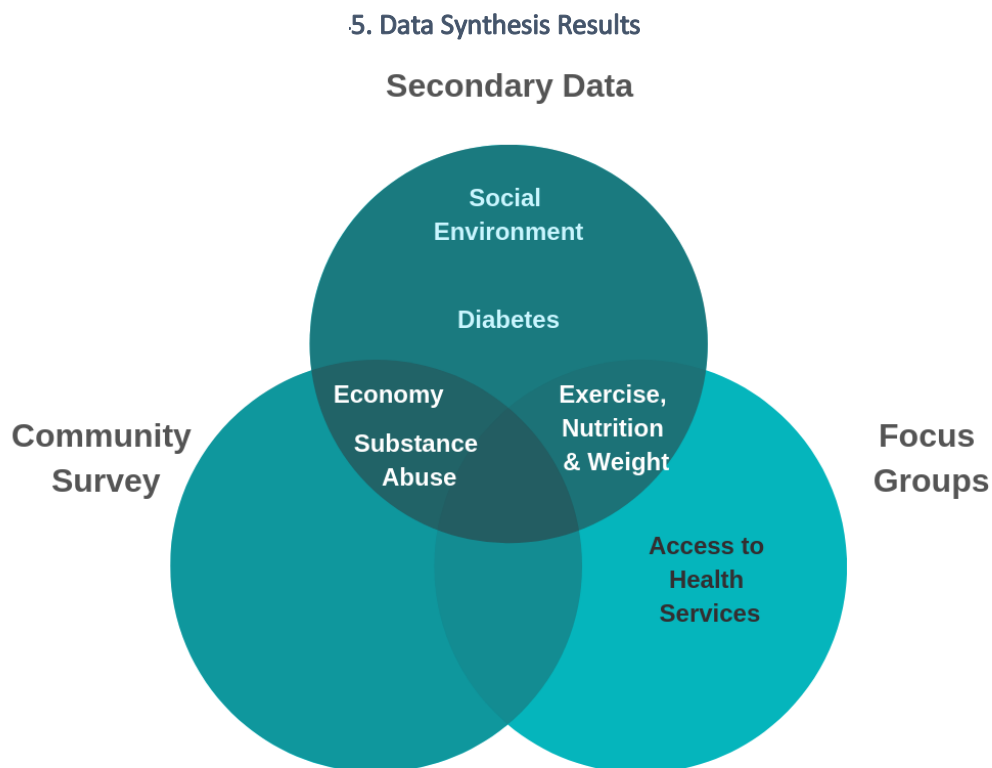

Across all three data sources, there is strong evidence of need for Access to Health Services, Substance Abuse, Economy and Exercise, Nutrition & Weight. As seen in Figure 45, the survey results and focus group discussion analysis cultivated additional topics not ranked as top priorities in the secondary data findings. A mixed-methods approach is a strength when assessing a community as a whole. This process ensures robust findings through statistical analysis of health indicators and examination of constituent's perceptions of community health issues.

Topic Areas Examined in This Report

Six topic areas were identified as high scoring across the three data sources. These topics are listed in Table 11.

Table 11. Topic Areas Examined In-Depth in this Report

Access to Health Services
Diabetes*
Economy*
Exercise, Nutrition & Weight*
Social Environment*
Substance Abuse*

The five topic areas with the highest secondary data scores (starred*) are explored in-depth in the next section and include corresponding data from community participants when available. Following the five topic areas is a section called 'Other Significant Health Needs' which includes discussion of the additional topics that were identified specifically in the community survey and focus group discussions. The additional topics in 'Other Significant Health Needs' includes Access to Health Services.

Navigation Within Each Topic

Findings are organized by topic area. Within each topic, key issues are summarized followed by a review of secondary and primary data findings. Special emphasis is placed on populations that are highly impacted, such as older adults, race/ethnic groups or low-income populations. Figures, tables and extracts from quantitative and qualitative data substantiate findings. Each topic includes a table with key indicators from the secondary data scoring results. The value for Hyde County is displayed alongside relevant comparisons, gauges and icons which are color-coded with green indicating good, red indicating bad and blue indicating neutral. Table 12 describes the gauges and icons used to evaluate the secondary data.

Table 12. Description of Gauges and Icons used in Secondary Data Scoring

Gauge or Icon	Description
	Green represents the "best" 50th percentile.
	Yellow represents the 50th to 25th quartile
	Red represents the "worst" quartile.
	There has been a non-significant increase/decrease over time.
	There has been a significant increase/decrease over time.
	There has been neither a statistically significant increase nor decrease over time.

Substance Abuse

Key Issues

- Liquor store density is the greatest issue in Hyde County concerning substance abuse.
- The rate of alcohol-impaired driving deaths is higher in Hyde County compared to the rates in North Carolina and the U.S.
- Smoking is a key issue with Hyde County having a higher adult smoking rate compared to the rates in North Carolina and the U.S.

Secondary Data

The secondary data scoring results reveal "liquor store density" as the top need in Hyde County with a score of 2.7. Additional analysis is performed to find specific indicators that contribute to this area of concern, and these indicators are identified with high indicator data scores, shown in Table 13.

Table 13. Data Scoring Results for Substance Abuse

Score	Indicator (Year) (Units)	Hyde County	North Carolina	U.S.	North Carolina Counties	U.S. Counties	Trend	Healthy NC 2020	HP 2020
2.55	Adults who Smoke (2016) (percent)	20.3	17.9	17				13	12
2.65	Alcohol-Impaired Driving Deaths (2012-2016) (percent)	50	31.4	29.3				4.7	-
2.7	Liquor Store Density (2015) (stores/ 100,000 population)	36.2	5.8	10.5				-	-

See Appendix B for full list of indicators included in each topic area

Liquor store density is a clear area of concern for Hyde County based on the 2 highest scoring indicators within this area. The indicator score for liquor store density is 2.7, with Hyde County having a rate of 36.2 (per 100,000 population) compared to 5.8 for North Carolina and 10.5 for the U.S. This rate is trending upward. In addition, the adult smoking rate in Hyde County is higher at 20.3% than 17.9% for North Carolina and 17% for the U.S., where none of these rates met the Healthy People 2020 Goal of 12%. Additionally, the rate for alcohol-impaired deaths is higher for Hyde County at 50 compared to 31.4 for North Carolina and 29.3 for the U.S, where this association is trending upward.

Primary Data

Community survey participants ranked substance abuse (28.1%) as a top issue affecting quality of life in Hyde County. Additionally, 40.8% of community survey respondents reported wanting to learn more about substance abuse prevention.

15.7% of survey participants reported currently use tobacco products. Of those who reported tobacco product use, 38.6% reported that they don't know where they would go and 29.4% reported that they did not want to quit. 51.7% of survey participants reported having been exposed to secondhand smoke in the last year. Of those who indicated that they had been exposed to secondhand smoke, 48.3% of survey respondent reported exposure in the home, 23.3% were exposed in 'other' locations and 15.8% were exposed in the work place. Most participants (79%) reported that in the past 30 days, there were zero times where they drank more than 4/5 drinks on a single occasion and 6.9% had one time. Reported illicit drug use amongst survey participants in the past 30-days was low, 96.1% reported no illegal drug use and 96.5% reported no use of prescription drugs they did not have a prescription for. Of those who reported any illegal drug use (<5%) in the past 30 days, 71.4% reported marijuana use and 57.1% reported cocaine use.

Participants brought up substance use eight times during focus group discussions. Many participants see prescription drug misuse, overdose and alcohol as problems that needs to be addressed in the community. One participant mentioned a need for substance abuse prevention and treatment services in the community. Two participants raised concerns that families, and specifically children, dealing with addiction are getting the appropriate services that they need.

> "Support is needed for caregivers of children whose parents are addicted to ensure that these children are getting the support and care they need (mental health services)."
> -Focus Group Participant

Highly Impacted Populations

No specific groups were identified in the primary data sources.

Diabetes

Key Issues

- Diabetes is the major issue within the Medicare Population.
- The death rate from diabetes is higher for Hyde County compared to the rates for North Carolina and the U.S.
- Financial barriers may prohibit community members from seeking treatment or purchasing medications.

Secondary Data

The secondary data scoring results reveal diabetes as a major need in Hyde County with a score of 1.9. Additional analysis is performed to find specific indicators that contribute to this area of concern, and these indicators are identified with high indicator data scores, as shown in Table 14.

Table 14. Data Scoring Results for Diabetes

Score	Indicator (Year) (Units)	Hyde County	North Carolina	U.S.	North Carolina Counties	U.S. Counties	Trend
2.3	Diabetes: Medicare Population (2015) (percent)	36.7	28.4	26.5			
2.05	Adults 20+ with Diabetes (2014) (percent)	12.5	11.1	10			
2.28	Age-Adjusted Death Rate due to Diabetes (2012-2016) (deaths/ 100,000 population)	53.9	23	21.1			

*See *Appendix B* for full list of indicators included in each topic area*

Diabetes is a major concern for Hyde County. The indicator score for diabetes within the Medicare Population for Hyde County is 2.3 with a rate of 36.7%. This rate is higher than the rates for both North Carolina (28.4%) and the U.S (26.5%), but this association is trending downward. Additionally, the death rate from diabetes for Hyde County is 53.9 deaths (per 100,000 population), which is higher than the rates for North Carolina (23) and the U.S. (21.1). This association is trending upward along with the rates for adults (20+) with diabetes in Hyde County (12.5%) compared to North Carolina (11.1%) and the U.S. (10%).

Primary Data

Community survey respondents rated eating well/nutrition, exercising/fitness and going to the doctor for yearly checkups and screenings as topics the community needs more information about which may also impact the adult population living with Diabetes. 21.8% of community survey participants reported being told by a medical professional that they has diabetes and 52.3% had been told that they were overweight or obese.

Diabetes was raised two times during the focus group discussions as an issue the community was facing though the topic was not discussed in depth. Across all focus group discussions, participants conversed about barriers in the community to eating healthy and exercising. Most participants discussed financial limitations to eating healthier and lack of healthy food options in the community.

Highly Impacted Populations

Data scoring indicated that highly impacted population include the Medicare population and adults over 20 years old. No other specific groups were identified in the primary data sources.

Social Environment

Key Issues

- 22% of people in Hyde County live below the poverty line.
- Around 28% of children in Hyde County live below the poverty line.
- Over 40% of households in Hyde County are single-parent households.
- Community members desire more or better recreational facilities.

Secondary Data

From the secondary data scoring results, Social Environment received a score of 1.8. Some of the interesting top scoring indicators are outlined in Table 15. Many of the indicators in the Social Environment topic area also overlap with indicators in the Economy and Transportation topics, as these quality of life issues are interconnected. The indicators are related to social connectivity and feeling supported or a part of the community.

Table 15. Data Scoring Results for Social Environment

Score	Indicator (Year) (Units)	Hyde County	North Carolina	U.S.	North Carolina Counties	U.S. Counties	Trend	Healthy NC 2020	HP 2020
2.3	People Living Below Poverty Level (2012-2016) (percent)	22.4	16.8	15.1				12.5	-
2	Children Living Below Poverty Level (2012-2016) (percent)	28.6	23.9	21.2				-	-
2	Population 16+ in Civilian Labor Force (2012-2016) (percent)	55	61.5	63.1				-	-
2.15	Single-Parent Households (2012-2016) (percent)	41.8	35.7	33.6				-	-
2.4	Per Capita Income (2012-2016) (dollars)	18770	26779	29829				-	-
2.35	Median Household Income (2012-2016) (dollars)	37741	48256	55322				-	-

72

2.18	Median Housing Unit Value (2012-2016) (dollars)	75600	157100	184700			=	-	-
2.7	Homeownership (2012-2016) (percent)	41.8	55.5	55.9			↘	-	-
2.5	People 25+ with a Bachelor's Degree or Higher (2012-2016) (percent)	8.7	29	30.3			↘	-	-
2.5	Social Associations (2015) (membership associations/ 10,000 population)	7.2	11.5	9.3			↘	-	-
2.4	Total Employment Change (2014-2015) (percent)	-10.3	3.1	2.5				-	-

See Appendix B for full list of indicators included in each topic area

The indicator score for homeownership is 2.7 with Hyde County having a rate of 41.8% compared to 55.5% for North Carolina and 55.9% for the U.S. However, this association is trending downward along with the associations for people and children living below the poverty line, median household income, social associations, and single-parent households. The indicator, social associations, has a high indicator score of 2.5, where Hyde County has a rate of 7.2 (per 10,000 population) compared to 11.5 for North Carolina and 9.3 for the U.S. People (25+) with a bachelor's degree is another indicator with a score of 2.5, but Hyde County's rate (8.7) is lower than the rates for North Carolina (29) and the U.S. (30.3). Moreover, per capita income and total employment change both have indicator scores of 2.4, but no trends were associated with these outcomes.

Primary Data

Among community survey respondents, positive teen activities was ranked third and better or more recreational facilities was seventh of the services needing improvement in the community. Over 70% of survey participants disagreed or strongly disagreed that there are good parks and recreation facilities in the community. 2.2% of survey participants felt that lack of community support was a top issue affecting the quality of life in the community and 37% disagreed or strongly disagreed that there is help for people during times of need in the county.

Highly Impacted Populations

No specific groups were identified in the primary data sources.

Exercise, Nutrition & Weight

Key Issues

- Nearly 1 out of 3 adults in Hyde County is sedentary.
- The food insecurity and child food insecurity rates are higher in Hyde County compared to the rates in North Carolina and the U.S.
- The food environment index is lower in Hyde County than in North Carolina and the U.S.

Secondary Data

From the secondary data scoring results, "nutrition, exercise and weight" received a score of 1.8. Some of the interesting top scoring indicators are outlined in Table 16 below. These results display the healthy food access challenges for Hyde County compared to North Carolina and the U.S.

Table 16. Data Scoring Results for Nutrition, Exercise & Weight

Score	Indicator (Year) (Units)	Hyde County	North Carolina	U.S.	North Carolina Counties	U.S. Counties	Trend	Healthy NC 2020	HP 2020
2.3	Child Food Insecurity Rate (2016) (percent)	25.3	20.9	17.9				-	-
2.3	Food Insecurity Rate (2016) (percent)	20.2	15.4	12.9				-	-
2.3	Adults 20+ who are Sedentary (2014) (percent)	30	24.3	23				-	32.6
2.3	Food Environment Index (2018) (-)	4.1	6.4	7.7				-	-

See Appendix B for full list of indicators included in each topic area

The indicator score for sedentary adults is 2.3, where Hyde County has a higher rate of 30% compared to 24.3% for North Carolina and 23% for the U.S. This association is trending upward along with the rates for the food environment index with an indicator score of 2.3 too. However, child food insecurity and food insecurity rates are both trending downward, even while Hyde County has higher rates than North Carolina and the U.S. in both those categories.

Primary Data

Among community survey respondents, 45.5% rated their health is good and 24.7% rated their health as very good. However, 52.3% of respondents reported being told by a health professional that they were overweight and/or obese. This was closely followed by high reports of high blood pressure (46.8%), high cholesterol (39.5%) and diabetes (21.8%). Additionally, data from the community survey participants show that 53% of community members do not engage in any physical activity or exercise during the week that lasts at least 30 minutes. Among individuals that do not exercise, respondents reported not having enough time, being too tired to exercise and not having access to a facility that has what they need. For those individuals that do exercise, 72.9% reported exercising or engaging in physical activity at home while 16.9% selected 'other' location and some exercise at a worksite/employer location (13.1%).

> "Construct a wellness center/community gym/pool that is centrally located. Controlled environment with heating, air-will enable residents to exercise without deal with mosquitoes and ticks."
> -Focus Group Participant

Exercise, Nutrition & Weight was discussed in all focus groups. Participants shared their concerns for nutrition amongst both young people and adults in the community. They shared that they struggled with not knowing where or how to eat healthy and what to select as healthy food choices when eating away from home. Participants also felt that there was a lack of exercise facilities in the community that met their needs, such as hours of operation not aligning with work schedule and not being close enough to be able to access regularly. To emphasize this point, when community members were asked about specific topic areas they were interested in learning more about in the community survey, managing weight and exercise/nutrition were high frequency responses.

Highly Impacted Populations

No specific groups were identified in the primary data sources.

Economy

Key Issues

- Nearly all students are eligible for the Free Lunch Program in Hyde County.
- 23% of families live below the poverty line in Hyde County.
- 29% of children live below the poverty line in Hyde County.
- About 1 in 4 children is affected by food insecurity in Hyde County.

Secondary Data

From the secondary data scoring results, economy received a score of 1.8. Some of the interesting top scoring indicators are outlined in Table 17. Clearly, poverty affects Hyde County at higher rates compared to North Carolina and the U.S. Moreover, food insecurity is a major issue in Hyde County along with the median household income among families.

Table 17. Data Scoring Results for Economy

Score	Indicator (Year) (Units)	Hyde County	North Carolina	U.S.	North Carolina Counties	U.S. Counties	Trend	Healthy NC 2020	HP 2020
2.3	People Living Below Poverty Level (2012-2016) (percent)	22.4	16.8	15.1				12.5	-

2.4	Total Employment Change (2014-2015) (percent)	-10.3	3.1	2.5			↘	-	-

See Appendix B for full list of indicators included in each topic area

The indicators, "students eligible for the free lunch program" and "homeownership", both have a score of 2.7, but these associations are trending downward. The only indicators with upward trends are "people living 200% above the poverty line" and "population (16+) in the civilian labor force," where

Hyde County has lower rates than North Carolina and the U.S. in both categories. Notably, the unemployment rate in the civilian labor force is higher in Hyde County at 7.9% compared to 3.7% for North Carolina and the U.S. Moreover, Hyde County has a higher rate of people living below the poverty line at 22.4% compared to 16.8% for North Carolina and 15.1% for the U.S.

Primary Data

Community survey participants were asked to rank the issues most negatively impacting their community's quality of life. According to the data, both poverty and the economy were the top issues in Hyde County that negatively impact quality of life. Community survey participants were also asked to weigh-in on areas of community services that needed the most improvement. With the highest share of responses, availability of employment (32.3%) ranked first and higher paying employment (11.2%) ranked second.

Focus group participants also touched on key economic stressors: challenges with being able to keep up with the cost of living, need for more jobs, health insurance costs and being able to afford healthy foods. One participant shared they were concerned with people with higher incomes leaving the community and this having an impact on financing the education system.

Highly Impacted Populations

No specific groups were identified in the primary data sources.

Mortality

Knowledge about the leading causes of death in a population is critical to understanding how to target interventions to maximize population health. Table 18 shows the leading causes of mortality in Hyde

County, North Carolina, and Health ENC Counties in 2014-2016, where the rate is age-adjusted to the 2000 U.S. standard population and is given as an age-adjusted death rate per 100,000 population.

Table 18. Leading Causes of Mortality (2014-2016, CDC WONDER)

	Hyde County			North Carolina			Health ENC Counties		
Rank	Cause	Deaths	Rate*	Cause	Deaths	Rate*	Cause	Deaths	Rate*
1	Cancer	51	223.1	Cancer	58,187	165.1	Cancer	12,593	177.5
2	Heart Diseases	43	184.8	Heart Diseases	54,332	159	Heart Diseases	12,171	178.8
3	Chronic Lower Respiratory Diseases	15	Unreliable	Chronic Lower Respiratory Diseases	15,555	45.1	Cerebrovascular Diseases	3,247	48.5

*Age-adjusted death rate per 100,000 population

Other Significant Health Needs

Access to Health Services

Secondary Data

From the secondary data scoring results, the Access to Health Services topic had a score of 1.60 and was the 8th highest scoring health and quality of life topic. High scoring related indicators include: Mental Health Provider Rate (2.50) and Primary Care Provider Rate (2.10).

A list of all secondary indicators within this topic area is available in Appendix B.

Primary Data

As previously summarized, more than half of community survey respondents have health insurance through an employer (53%) followed by Medicare (24.8%). Participants were asked where they most often go to seek medical treatment, many sought care at a doctor's office (57%) , 15.3% get care at the health department and 10.6% sought care at an urgent care center. The majority of participants did not report any problems getting the health care they needed in the past 12 months (83.3%). For those who reported have difficulties accessing health care services, the most common reported providers that they had trouble getting services from were a specialist (35.1%), dentist (29.7%), eye care (21.6%), and pharmacy (18.9%). The top reasons participants reported not being able to get the necessary health care they needed were they did not have insurance (39.5%), insurance didn't cover what they needed (26.3%) or the share of the cost was too high (23.7%). 16.7% of participants reported being able to see the medical provider they needed within Hyde County while many sought care in other places such as Beaufort County (57.9%).

> "Because of the distance to doctors especially specialty services, people are a lot less likely to seek care. Lots of time and driving for initial and follow up visit to certain doctors."
> -Focus Group Participant

Focus Group participants frequently discussed barriers to accessing health services such as scheduling appointments with health care providers, challenges with providers accepting their health insurance plan and lack of transportation to medical centers, specifically for specialty care services. Senior citizens were also brought up as a group who are unable to access medical services as easily because of financial restrictions and lack of access to transportation.

A Closer Look at Highly Impacted Populations

Several subpopulations emerged from the primary and secondary data for their disparities in access to care, risk factors, and health outcomes. This section focuses on these subpopulations and their unique needs.

Disparities by Age, Gender and Race/Ethnicity

Secondary data are further assessed to determine health disparities for race/ethnic, age, or gender groups. Table 19 identifies indicators in which a specific population subgroup differs significantly and negatively from the overall population in Hyde County, with significance determined by non-overlapping confidence intervals.

Table 19. Indicators with Significant Race/Ethnic, Age, or Gender Disparities

Health Indicator	Group(s) Disparately Affected*
Per Capita Income	Black or African American, Hispanic or Latino
People Living Below Poverty Level	12-17, 18-24
Children Living Below Poverty Level	12-17
People 25+ with a High School Degree or Higher	Black or African American
Workers who Drive Alone to Work	20-24, 55-59, 60-64, 65+, Asian, Two or More Races

*See HealthENC.org for indicator values for population subgroups

The list of indicators with significant disparities should be interpreted with caution. Indicators beyond those displayed in Table 19 may also negatively impact a specific subgroup; however, not all data sources provide subpopulation data, so it is not possible to draw conclusions about every indicator used in the secondary data analysis.

Geographic Disparities

Geographic disparities are identified using the SocioNeeds Index®. Zip code 27824, with an index value of 92.8, has the highest socioeconomic need within Hyde County, potentially indicating poorer health outcomes for its residents. See the SocioNeeds Index® for more details, including a map of Hyde County zip codes and index values.

Conclusion

The Community Health Needs Assessment utilized a comprehensive set of secondary data indicators measuring the health and quality of life needs for Hyde County. The assessment was further informed with input from Hyde County residents through a community survey and focus group discussions that included participants from broad interests of the community. The data synthesis process identified six significant health needs: Access to Health Services, Diabetes, Economy, Exercise, Nutrition & Weight, Social Environment and Substance Abuse. The prioritization process identified the following focus areas:

- Access to Mental Health Care / Services

- Healthy Living

- Substance Use / Abuse

Following this process, Hyde County will assess progress on focus areas since the last CHNA and outline how it plans to address these health needs in its overall county action / implementation plan. The action plans specific to the county will be reported by the Hyde County Health Department in their Action Plan and those actions led by Vidant Beaufort Hospital will be reported in their Implementation Strategy. Feedback on these reports will be incorporated into the next CHNA process.

We hope to incorporate any feedback on this report into the next CHNA process. Please send your feedback and comments to Anna Schafer at aschafer@hydehealth.com or Jennifer Lewis at Jennifer.Lewis@vidanthealth.com.

Appendix A. Impact Since Last CHNA

Health Priority Category Identified in Preceding CHNA	Planned Activities to Address Health Needs Identified in Preceding Implementation Strategy	Was Activity Implemented (Yes/No)	Outcomes of Initiatives

Obesity/Chronic Disease Prevention	**Goal: To improve outcomes and quality of life for adults with chronic illness (i.e. diabetes, heart disease, and stroke).**
	
	1. Screenings
	2. Health Education for Prevention
	3. Rehabilitation and Exercise Programs
	4. Provide Support and/funding through Community Benefit Grant and Health Initiatives program and other community partnerships that focus on chronic disease prevention and management.
	5. Our Community Health Improvement Coordinator, a Registered Nurse, will continue to
		Yes	1. Vidant Beaufort has partnered with churches, non-profits, schools, businesses in Beaufort and Hyde Counties to conduct 2,040 total health screenings to include:
			• 1,112 Well screens (body mass index, blood pressure, blood glucose, and blood cholesterol)
			• 561 Blood pressure Screens
			• 185 Breast Cancer Screens
			• 182 Skin Cancer Screens
			Hyde County Screenings/Outreach Events:
			   ○ **Hyde County Health Department Open House 2017 (28 well screens, 23 skin screens and 10 breast screens)**
			   ○ **Belhaven Breast Screens 44 (2017-19)**
			   ○ **Belhaven Skin Screens 56 (2017-19)**
			   ○ **Sports Physicals provided free to Hyde County Schools**
			   ○ **Project Direct Legacy Health Forum 2018– Engelhard - 25 well screens**
			   ○ **Project Direct Legacy Health Forum 2019 – Swan Quarter – 19 well screens**
			   ○ **Project Direct Legacy Health Forum 2019 – Swan Quarter – 16 well screens and 4 Breast Screens**
			2. Vidant Beaufort team members have shared health education information to over 3,000 community members to include:
			• 79 speaking engagements at various senior centers, churches, schools and civic organizations,

	plan, organize and oversee community health fairs / free wellness screenings and to be a liaison between our hospital with churches, schools, health departments and civic organizations to seek opportunities to share ways to improve overall community health and wellness. 6. Continue participation in the HealThy Neighbor faith health partnerships with local faith organizations in Beaufort and Hyde Counties to promote healthy lifestyles and to provide health education.		• 2,040 health screenings • Vidant Health events such as Pink Power breast cancer awareness lunches (586 attendees) and Heart Truth Heart Health awareness (541 attendees) attract attendees from both Beaufort and Hyde counties. • 128 health education articles have been submitted to the Washington Daily News weekly Health Beat column related to health and wellness, exercise, nutrition as well as cancer prevention and early detection. • Each year Vidant Beaufort has submitted editorial content for their quarterly Healthy Living publication related to health and wellness, exercise, nutrition as well as cancer prevention and early detection. • Vidant Beaufort Hospital maintains an active Facebook page that shares information about health education. **Hyde County Health Education/Prevention events include:** o **Hyde County National Night Out 2018 Stroke education display** o **Dinner with a Doc – Colon Cancer Awareness, Engelhard – 52 attended.** o **Project Direct Legacy Health Forum (3 screening/health education events) since 2016** 3. Vidant Wellness Center along with Vidant Rehab Services continue to provide programs to our service area of Beaufort and Hyde counties such as: • Cardiac Rehab • Pulmonary Rehab • Speech therapy • Occupational therapy • Various exercise programs **4.** Vidant Beaufort Community Benefit Grant program has granted a total of $293,000 in funding to 45 programs since the 2016 CHNA. Many of these programs address Chronic

			Disease Prevention and Management. **Hyde County based programs include:**
			   ○ **Project Direct Legacy of Hyde County**
			   ○ **Albemarle Development Corporation – Meals on Wheels**
			   ○ **Food Bank of the Albemarle/ Beaufort & Hyde Counties**
			   ○ **Hyde County Health Department – Healthy Mothers/Healthy Families**
			5. Community Health Improvement coordinator has planned, organized and coordinated participation in over 300 health events since 2016 CHNA. **13 events are specific to Hyde County.**
			6. Beaufort County HealTHY Neighbor partnering faith organizations have increased from 3 to 13.

Access to Care	**Goal: To improve access to health care especially for the uninsured/underinsured patient population.**
	1. Continued commitment to providing quality health care to everyone who seeks our services.
	2. Continue to provide financial counselors who can assist with determining if patients qualify for Medicaid and in applying for other government-assisted programs.
		Yes	1. Vidant Beaufort Hospital continues to provide high quality health care for all who seek our services.
			   • 2018 our hospital opened a newly expanded up-to-date Emergency Department.
			   • Speech and Occupational Therapy services have been added to our Rehab.
			   • Opened the Vidant Multispecialty Clinic Belhaven in 2016. This clinic is open 24/7.
			2. Financial counseling continues to be provided for patients
			3. Charity care continues to be offered.
			4. Vidant Medical Group has recruited 23 new providers since 2016. Its primary care offices have expanded hours of operation as well as added weekend hours to increase access to care throughout the Beaufort Market.
			5. Four Vidant Medical Group Beaufort Market family practices are Patient Centered Medical Homes.
			6. Vidant Beaufort executive leadership members are actively engaged in the work of Beaufort County 360.

	3. Continue to offer charity care to our patients who are unable to pay due to financial hardships. 4. Collaborate with Vidant Medical Group to help recruit additional primary care and specialty providers to help keep care local. 5. Partner with Vidant Medical Group and local primary care practices as they work towards implementing the patient-centered medical home model of care which will provide greater access to needed services, better quality of care, greater focus on prevention, as well as early identification and management of health problems. 6. Serve as one of the lead organizations for Beaufort County 360, an alliance of community health agencies, schools, social service organizations and non-profits working to address the most critical needs in Beaufort County including access to care.		7. Vidant Beaufort Hospital continues to collaborate with Hyde County Health Department to help resident's access health care services in the community. 8. Vidant Beaufort has provided Community Benefit Grant funding for many programs that address access to care issues. **Programs more specific to Hyde County include:** • **Albemarle Development Corporation – Meals on Wheels** • **Food Bank of the Albemarle/ Beaufort & Hyde Counties** • **Hyde County Health Department – Healthy Mothers/Healthy Families** • **Hyde County Non-Profit Transportation Corporation/Medical Transportation** • **Project Direct Legacy of Hyde County**

	7. Provide representation on the Hyde Partners for Health committee. 8. Provide support and/or funding through our Community Benefit Grants and Health Initiatives program and other community partnerships that focus on access to care.		
Substance Abuse	**Goal: To improve access to services for mental health and substance abuse patients.** 1. Continue to provide an inpatient behavioral health unit. 2. Collaborate with Vidant Medical Group to continue to provide mental health services in the region through Vidant Behavioral Health with locations in Washington, Swan Quarter and Ocracoke. 3. Provide comprehensive care management and transitional care program for low-income individuals diagnosed with both severe mental illness and chronic disease including care management, care coordination, primary care,	Yes	1. Vidant Beaufort Hospital has provided inpatient behavioral health services over the last 3 years; however, this service ended mid-August 2019. 2. Vidant Medical Group continues to provide mental health services in the region through Vidant Behavioral Health locations in Beaufort, Hyde, Martin and Washington counties. 3. Vidant Beaufort Hospital offers a program that is funded by Kate B. Reynolds Charitable Trust – Alliance for Healthy Communities – to provide care management and transitional care to adults diagnosed with several mental illness and chronic disease that are who have at least two visits from either the behavioral health unit and/or the emergency department. A Licensed Clinical Social Worker and Registered Nurse work together to assess patients from Beaufort and Hyde Counties for enrollment in the program. These patients are provided support to monitor treatment compliance. The LCSW and RN also support patients by connecting them with a primary care provider, provide financial assistance for transportation and medications as well as support patients to complete Medicaid/Health

	and pharmaceutical assistance. 4. Participate on the Beaufort County 360 mental health task force. 5. Support Project LAZURUS in both Beaufort and Hyde counties		Assist/NC MedAssist applications with the Department of Social Services. 4. Vidant Beaufort executive leadership members (President, Director of Community Outreach and Director of Clinical Support Services) are actively engaged in the work of Beaufort County 360. BC 360 is a community collaborative working to enhance effectiveness in Childcare, Health, Literacy and Families for citizens of Beaufort County. Vidant Beaufort also participates in the BC 360 Behavioral Health Task Force that is actively working on addressing the opioid crisis in our region. One initiative of the behavioral health task force is five-county coalition that includes Beaufort, Hyde, Martin, Tyrrell and Washington counties that have developed a Recovery Drug Court. This program will help adults with substance use disorders become and remain drug free through treatment and recovery. 5. Our community partner, the Hyde County Health Department offers programs to support substance abuse awareness. They offer FREE Naloxone kits to residents as needed.

Note: The IRS requirements state that charitable hospitals must evaluate the impact of the actions taken to address the significant health needs from the previous CHNA report. This information provides outcomes and progress from the 2016 CHNA Implementation Strategy. Some of these initiatives were the result of collaboration with both the Beaufort and Hyde County Health Departments. This report does not include all of the initiatives funded by the Vidant Health Foundation Community Benefit Grants Program.

Appendix B. Secondary Data Scoring

Overview

Data scoring consists of three stages, which are summarized in Figure 46:

Comparison Score

For each indicator, Hyde County is assigned up to 7 comparison scores based on its comparison to other communities, whether health targets have been met, and the trend of the indicator value over time. Comparison scores range from 0-3, where 0 indicates the best outcome and 3 indicates the worst outcome (Figure 47).

Indicator Score

Indicator scores are calculated as a weighted average of comparison scores. Indicator scores range from 0-3, where 0 indicates the best outcome and 3 indicates the worst outcome (Figure 47).

Topic Score

Indicators are then categorized into topic areas. Topic scores are calculated by averaging all relevant indicator scores, with indicators equally weighted. Topic scores range from 0-3, where 0 indicates the best outcome and 3 indicates the worst outcome (Figure 47). Indicators may be categorized into more than one topic area.

46. Secondary Data Scoring Overview

Comparison Score
- Quantitatively score all possible comparisons

Indicator Score
- Summarize comparison scores for each indicator

Topic Score
- Summarize indicator scores by topic area

Better → Worse
0 1 2 3
Comparison Scores

Up to 7 comparison scores were used to assess the status of Hyde County. The possible comparisons are shown in Figure 48 and include a comparison of Hyde County to North Carolina counties, all U.S. counties, the North Carolina state value, the U.S. value, Healthy People 2020 targets, Healthy North Carolina 2020 targets, and the trend over time. Availability of each type of comparison varies by indicator and is dependent upon the data source, comparability with data collected for other communities, and changes in methodology over time. The determination of comparison scores for each type of comparison is discussed in more detail below.

Indicator Score

Topic Score
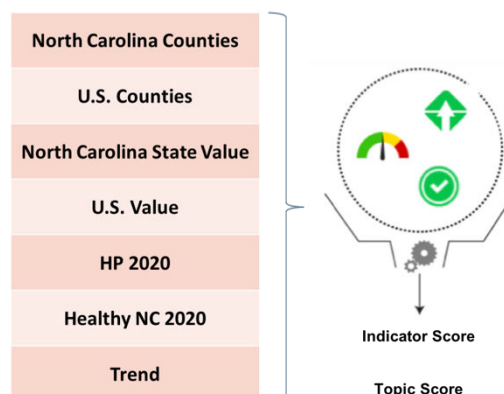

Comparison to a Distribution of North Carolina Counties and U.S. Counties

Compare to Distribution Indicator Gauge

For ease of interpretation and analysis, indicator data on HealthENC.org is visually represented as a green-yellow-red gauge showing how Hyde County is faring against a distribution of counties in North Carolina or the U.S. (Figure 49).

A distribution is created by taking all county values within the state or nation, ordering them from low to high, and dividing them into four equally sized groups based on their order (Figure 50). The comparison score is determined by how Hyde County falls within these four groups or quartiles.

Figure 50. Distribution of County Values

All County Values | Ordered by Value | Divided into Quartiles

Comparison to North Carolina Value and U.S. Value

51. Comparison to Single Value

As shown in Figure 51, the diamond represents how Hyde County compares to the North Carolina state value and the national value. When comparing to a single value, the comparison score is determined by how much better or worse the county value is relative to the comparison value.

Comparison to Healthy People 2020 and Healthy North Carolina 2020 Targets

As shown in Figure 52, the circle represents how Hyde County compares to a target value. Two target values are taken into consideration for this analysis:

Comparison to Target Value

Healthy People 2020 and Healthy North Carolina 2020. Healthy People 2020[2] goals are national objectives for improving the health of the nation set by the Department of Health and Human Services' (DHHS) Healthy People Initiative. Healthy North Carolina 2020[3] objectives provide a common set of health indicators that the state can work to improve. The North Carolina Institute of Medicine, in collaboration with the Governor's Task Force for Healthy Carolinians; the Division of Public Health, North Carolina Department of Health and Human Services (NC DHHS); the Office of Healthy Carolinians and Health Education, NC DHHS; and the State Center for Health Statistics, NC DHHS, helped lead the development of the Healthy NC 2020 objectives. When comparing to a target, the comparison score is determined by whether the target is met or unmet, and the percent difference between the indicator value and the target value.

Trend Over Time

As shown in Figure 53, the square represents the measured trend. The Mann-Kendall statistical test for trend is used to assess whether the value for Hyde County is increasing or decreasing over time and whether the trend is statistically significant. The trend comparison uses the four most recent comparable values for the county, and statistical significance is determined at the 90% confidence level. For each indicator with values available for four time periods, a comparison score is determined by the trend's direction and its statistical significance.

Figure 53. Trend Over Time

Missing Values

Indicator scores are calculated using the comparison scores, availability of which depends on the data source. If an indicator does not have data for a specific comparison type that is included for indicator score calculations, the missing comparison is substituted with a neutral score. When information is unknown due to lack of comparable data, the neutral value assumes that the missing comparison score is neither good nor bad and does not impact the indicator's weighted average.

Indicator Scoring

Indicator scores are calculated as a weighted average of all included comparison scores. If none of the included comparison types are possible for an indicator, no score is calculated, and the indicator is excluded from the data scoring results.

Topic Scoring

Indicator scores are averaged by topic area to calculate topic scores. Each indicator may be included in up to three topic areas if appropriate. Resulting scores range from 0-3, where a higher score indicates a greater level of need as evidenced by the data. A topic score is only calculated if it includes at least three indicators.

Age, Gender and Race/Ethnicity Disparities

When a given indicator has data available for population subgroups – such as age, gender and race/ethnicity – and values for these subgroups include confidence intervals, we are able to determine if there is a significant difference between the subgroup's value and the overall value. A significant difference is defined as two values with non-overlapping confidence intervals. Confidence intervals are not available for all indicators. In these cases, disparities cannot be determined because there is not enough data to conclude whether two values are significantly different from each other.

Topic Scoring Table

Table 20 shows the Topic Scores for Hyde County, with higher scores indicating a higher need.

Table 20. Topic Scores for Hyde County

Health and Quality of Life Topics	Score

Prevention & Safety	0.73

Indicator Scoring Table

Table 21 (spanning multiple pages) presents the indicator data used in the quantitative data analysis. Indicators are grouped into topic areas and sorted by indicator score, with higher scores indicating a higher need. Hyde County values are displayed alongside various comparison values and the period of measurement. Additional data can be found on HealthENC.org.

Appendix C. Primary Data

Primary data used in this assessment was collected through a community survey and focus groups. The survey instruments and focus group questions are provided in this Appendix:

- English Survey
- Spanish Survey
- Focus Group Questions

Eastern North Carolina Community Health Survey 2018

Welcome to the Community Health Survey for Eastern North Carolina!

We are conducting a Community Health Assessment for your county. This assessment is being undertaken by a partnership of 33 counties, hospitals, health systems, and health departments in Eastern North Carolina. It allows these partners to better understand the health status and needs of the community they serve and use the knowledge gained to implement programs that will benefit the community.

We can better understand community needs by gathering voices from the community. This survey allows community members like you to tell us about what you feel are important issues for your community. We estimate that it will take about 20 minutes to complete this ~60 question survey. Your answers to these questions will be kept confidential and anonymous.

Thank you very much for your input and your time! If you have questions about this survey, please contact Will Broughton at will.broughton@foundationhli.org.

Part 1: Quality of Life

First, tell us a little bit about yourself...

1. Where do you currently live?

ZIP/Postal Code

2. What county do you live in?

☐ Beaufort	☐ Franklin	☐ Onslow
☐ Bertie	☐ Gates	☐ Pamlico
☐ Bladen	☐ Greene	☐ Pasquotank
☐ Camden	☐ Halifax	☐ Pender
☐ Carteret	☐ Hertford	☐ Perquimans
☐ Chowan	☐ Hoke	☐ Pitt
☐ Cumberland	☐ Hyde	☐ Sampson
☐ Currituck	☐ Johnston	☐ Tyrrell
☐ Dare	☐ Lenoir	☐ Washington
☐ Duplin	☐ Martin	☐ Wayne
☐ Edgecombe	☐ Nash	☐ Wilson

North Carolina County Map
3. Think about the county that you live in. Please tell us whether you "strongly disagree", "disagree", "neutral", "agree" or "strongly agree" with each of the next 9 statements.

Statements	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
There is good healthcare in my County.	☐	☐	☐	☐	☐
This County is a good place to raise children.	☐	☐	☐	☐	☐
This County is a good place to grow old.	☐	☐	☐	☐	☐
There is plenty of economic opportunity in this County.	☐	☐	☐	☐	☐
This County is a safe place to live.	☐	☐	☐	☐	☐
There is plenty of help for people during times of need in this County.	☐	☐	☐	☐	☐
There is affordable housing that meets my needs in this County.	☐	☐	☐	☐	☐
There are good parks and recreation facilities in this County.	☐	☐	☐	☐	☐
It is easy to buy healthy foods in this County.	☐	☐	☐	☐	☐

PART 2: Community Improvement

The next set of questions will ask about community problems, issues, and services that are important to you. Remember your choices will not be linked to you in any way.

4. Please look at this list of community issues. In your opinion, which <u>one</u> issue most affects the quality of life in this County? *(Please choose only one.)*

☐ Pollution (air, water, land)

☐ Dropping out of school

☐ Low income/poverty

☐ Homelessness

☐ Lack of/inadequate health insurance

☐ Hopelessness

☐ Discrimination/ racism

☐ Lack of community support

☐ Drugs (Substance Abuse)

☐ Neglect and abuse

☐ Elder abuse

☐ Child abuse

☐ Domestic violence

☐ Violent crime (murder, assault)

☐ Theft

☐ Rape/sexual assault

☐ Other (please specify)

5. In your opinion, which <u>one</u> of the following services needs the most improvement in your neighborhood or community? *(Please choose only one.)*

☐ Animal control

☐ Child care options

☐ Elder care options

☐ Services for disabled people

☐ More affordable health services

☐ Better/ more healthy food choices

☐ More affordable/better housing

☐ Number of health care providers

☐ Culturally appropriate health services

☐ Counseling/ mental health/ support groups

☐ Better/ more recreational facilities (parks, trails, community centers)

☐ Healthy family activities

☐ Positive teen activities

☐ Transportation options ☐ Availability of employment

☐ Higher paying employment

☐ Road maintenance

☐ Road safety

☐ None

☐ Other (please specify)

Now we'd like to hear more about where you get health information...

6. In your opinion, which <u>one</u> health behavior do people in your own community need more information about? *(Please suggest only one.)*

☐ Eating well/ nutrition

☐ Exercising/ fitness

☐ Managing weight

☐ Going to a dentist for check-ups/ preventive care

☐ Going to the doctor for yearly check-ups and screenings

☐ Getting prenatal care during pregnancy

☐ Getting flu shots and other vaccines

☐ Preparing for an emergency/disaster

☐ Other (please specify)

☐ Using child safety car seats

☐ Using seat belts

☐ Driving safely

☐ Quitting smoking/ tobacco use prevention

☐ Child care/ parenting

☐ Elder care

☐ Caring for family members with special needs/ disabilities

☐ Preventing pregnancy and sexually transmitted disease (safe sex)

☐ Substance abuse prevention (ex: drugs and alcohol)

☐ Suicide prevention

☐ Stress management

☐ Anger management

☐ Domestic violence prevention

☐ Crime prevention

☐ Rape/ sexual abuse prevention

☐ None

7. Where do you get most of your health-related information? *(Please choose only one.)*

☐ Friends and family   ☐ Internet   ☐ Employer

☐ Doctor/nurse   ☐ My child's school   ☐ Help lines

☐ Pharmacist   ☐ Hospital   ☐ Books/magazines

☐ Church   ☐ Health department

☐ Other (please specify)

8. What health topic(s)/ disease(s) would you like to learn more about?

[ ]

9. Do you provide care for an elderly relative at your residence or at another residence? *(Choose only one.)*

[ ]   Yes

[ ]   No

10. Do you have children between the ages of 9 and 19 for whom you are the caretaker? (Includes step-children, grandchildren, or other relatives.) *(Choose only one.)*

[ ]   Yes

[ ]   No   *(if No, skip to question #12)*

11. Which of the following health topics do you think your child/children need(s) more information about? *(Check all that apply.)*

[ ]   Dental hygiene   [ ]   Diabetes   [ ]   Drug abuse

[ ]   Nutrition   management   [ ]   Reckless

[ ]   Eating disorders   [ ]   Tobacco   driving/speeding

[ ]   Fitness/Exercise   [ ]   STDs (Sexually   [ ]   Mental health

[ ]   Asthma   Transmitted Diseases)   issues

management   [ ]   Sexual intercourse   [ ]   Suicide prevention

[ ]   Alcohol

[ ]   Other (please specify)

[ ]

117

These next questions are about your own personal health. Remember, the answers you give for this survey will not be linked to you in any way.

12. Would you say that, in general, your health is... *(Choose only one.)*

☐ Excellent

☐ Very Good

☐ Good

☐ Fair

☐ Poor

☐ Don't know/not sure

13. Have you ever been told by a doctor, nurse, or other health professional that you have any of the following health conditions?

	Yes	No	Don't Know
Asthma	☐	☐	☐
Depression or anxiety	☐	☐	☐
High blood pressure	☐	☐	☐
High cholesterol	☐	☐	☐
Diabetes (not during pregnancy)	☐	☐	☐
Osteoporosis	☐	☐	☐
Overweight/obesity	☐	☐	☐
Angina/heart disease	☐	☐	☐
Cancer	☐	☐	☐

14. Which of the following preventive services have you had in the past 12 months? *(Check all that apply.)*

☐ Mammogram

☐ Prostate cancer screening

☐ Colon/rectal exam

☐ Blood sugar check

☐ Cholesterol

☐ Hearing screening

☐ Bone density test

☐ Physical exam

☐ Pap smear

☐ Flu shot

☐ Blood pressure check

☐ Skin cancer screening

☐ Vision screening

☐ Cardiovascular screening

☐ Dental cleaning/X-rays

☐ None of the above

15. About how long has it been since you last visited a dentist or dental clinic for any reason? Include visits to dental specialists, such as orthodontists. *(Choose only one.)*

☐ Within the past year (anytime less than 12 months ago)

☐ Within the past 2 years (more than 1 year but less than 2 years ago)

☐ Within the past 5 years (more than 2 years but less than 5 years ago)

☐ Don't know/not sure

☐ Never

16. In the past 30 days, have there been any days when feeling sad or worried kept you from going about your normal activities? *(Choose only one.)*

☐ Yes

☐ No

☐ Don't know/not sure

17. The next question is about alcohol. One drink is equivalent to a 12-ounce beer, a 5 ounce glass of wine, or a drink with one shot of liquor.

Considering all types of alcoholic beverages, how many times during the past 30 days did you have 5 or more drinks (if male) or 4 or more drinks (if female) on an occasion?

☐ 0	☐ 4	☐ 8	☐ 12	☐ 16	☐ 20	☐ 24	☐ 28
☐ 1	☐ 5	☐ 9	☐ 13	☐ 17	☐ 21	☐ 25	☐ 29
☐ 2	☐ 6	☐ 10	☐ 14	☐ 18	☐ 22	☐ 26	☐ 30
☐ 3	☐ 7	☐ 11	☐ 15	☐ 19	☐ 23	☐ 27	

☐ Don't know / not sure

18. Now we will ask a question about drug use. The answers that people give us about their use of drugs are important for understanding health issues in the county. We know that this information is personal, but remember your answers will be kept confidential.

Have you used any illegal drugs within the past 30 days? When we say illegal drugs this includes marijuana, cocaine, crack cocaine, heroin, or any other illegal drug substance. On about how many days have you used one of these drugs? *(Choose only one.)*

☐ 0	☐ 4	☐ 8	☐ 12	☐ 16	☐ 20	☐ 24	☐ 28
☐ 1	☐ 5	☐ 9	☐ 13	☐ 17	☐ 21	☐ 25	☐ 29
☐ 2	☐ 6	☐ 10	☐ 14	☐ 18	☐ 22	☐ 26	☐ 30
☐ 3	☐ 7	☐ 11	☐ 15	☐ 19	☐ 23	☐ 27	

☐ Don't know / not sure

(if you responded 0, skip to question #20)

19. During the past 30 days, which illegal drug did you use? *(Check all that apply.)*

☐ Marijuana

☐ Cocaine

☐ Heroin

☐ Other (please specify)

[ ]

20. During the past 30 days, have you taken any prescription drugs that you did not have a prescription for (such as Oxycontin, Percocet, Demerol, Adderall, Ritalin, or Xanax)? How many times during the past 30 days did you use a prescription drug that you did not have a prescription for? *(Choose only one.)*

☐ 0	☐ 4	☐ 8	☐ 12	☐ 16	☐ 20	☐ 24	☐ 28
☐ 1	☐ 5	☐ 9	☐ 13	☐ 17	☐ 21	☐ 25	☐ 29
☐ 2	☐ 6	☐ 10	☐ 14	☐ 18	☐ 22	☐ 26	☐ 30
☐ 3	☐ 7	☐ 11	☐ 15	☐ 19	☐ 23	☐ 27	

☐ Don't know / not sure

21. The next question relates to veteran's health. Have you ever served on active duty in the US Armed Forces (not including active duty only for training in the Reserves or National Guard)? *(Choose only one.)*

☐   Yes

☐   No   *(if No, skip to question #23)*

22. Has a doctor or other health professional ever told you that you have depression, anxiety, or post traumatic stress disorder (PTSD)? *(Choose only one.)*

☐   Yes

☐   No

23. Now we'd like to know about your fitness. During a normal week, other than in your regular job, do you engage in any physical activity or exercise that lasts at least a half an hour? *(Choose only one.)*

☐   Yes

☐   No   *(if No, skip to question #26)*

☐   Don't know/not sure   *(if Don't know/not sure, skip to question #26)*

24. Since you said yes, how many times do you exercise or engage in physical activity during a normal week?

☐

25. Where do you go to exercise or engage in physical activity? *(Check all that apply.)*

☐ YMCA   ☐ Worksite/Employer

☐ Park   ☐ School Facility/Grounds

☐ Public Recreation Center   ☐ Home

☐ Private Gym   ☐ Place of Worship

☐ Other (please specify)

```
```

Since you responded YES to #23 (physical activity/exercise), skip to question #27.

26. Since you said "no", what are the reasons you do not exercise for at least a half hour during a normal week? You can give as many of these reasons as you need to.

☐ My job is physical or hard labor   ☐

☐ Exercise is not important to me.   ☐

☐ I don't have access to a facility that has the things I need, like a pool, golf course, or a   exercis

track.   ☐

☐ I don't have enough time to exercise.   I don't

☐ I would need child care and I don't have it.   ☐

☐ I don't know how to find exercise partners.   ☐

☐ I don't like to exercise.   ☐

☐ Other (please specify)

```
```

4

27. <u>Not</u> counting lettuce salad or potato products such as french fries, think about how often you eat fruits and vegetables in an average week.

How many cups per week of fruits and vegetables would you say you eat? *(One apple or 12 baby carrots equal one cup.)*

Number of Cups of Fruit

Number of Cups of Vegetables

Number of Cups of 100% Fruit Juice

28. Have you ever been exposed to secondhand smoke in the past year? *(Choose only one.)*

☐ Yes

☐ No   *(if No, skip to question #30)*

☐ Don't know/not sure   *(if Don't know/not sure, skip to question #30)*

29. If yes, where do you think you are exposed to secondhand smoke most often? *(Check only one.)*

☐ Home

☐ Workplace

☐ Hospitals

☐ Restaurants

☐ School

☐ I am not exposed to secondhand smoke.

☐ Other (please specify)

```

```

30. Do you currently use tobacco products? (This includes cigarettes, electronic cigarettes, chewing tobacco and vaping.) *(Choose only one.)*

[ ] Yes

[ ] No   *(if No, skip to question #32)*

31. If yes, where would you go for help if you wanted to quit? *(Choose only one).*

[ ] Quit Line NC   [ ] Health Department

[ ] Doctor   [ ] I don't know

[ ] Pharmacy   [ ] Not applicable; I don't want to quit

[ ] Private counselor/therapist

[ ] Other (please specify)

```

```

32. Now we will ask you questions about your personal flu vaccines. An influenza/flu vaccine can be a "flu shot" injected into your arm or spray like "FluMist" which is sprayed into your nose. During the past 12 months, have you had a seasonal flu vaccine? *(Choose only one.)*

[ ] Yes, flu shot

☐ Yes, flu spray

☐ Yes, both

☐ No

☐ Don't know/not sure

33. Where do you go <u>most often</u> when you are sick? *(Choose only one.)*

☐ Doctor's office   ☐ Medical clinic

☐ Health department   ☐ Urgent care center

☐ Hospital

☐ Other (please specify)

```
[                                                    ]
```

34. Do you have any of the following types of health insurance or health care coverage? *(Choose all that apply.)*

☐ Health insurance my employer provides

☐ Health insurance my spouse's employer provides

☐ Health insurance my school provides

☐ Health insurance my parent or my parent's employer provides

☐ Health insurance I bought myself

☐ Health insurance through Health Insurance Marketplace (Obamacare)

☐ The military, Tricare, or the VA

☐ Medicaid

☐ Medicare

☐ No health insurance of any kind

35. In the past 12 months, did you have a problem getting the health care you needed for you personally or for a family member from any type of health care provider, dentist, pharmacy, or other facility? *(Choose only one.)*

☐ Yes

☐ No   *(if No, skip to question #38)*

☐ Don't know/not sure

36. Since you said "yes," what type of provider or facility did you or your family member have trouble getting health care from? You can choose as many of these as you need to.

☐ Dentist   ☐

☐ General practitioner   ☐

☐ Eye care/ optometrist/ ophthalmologist   ☐

☐ Pharmacy/ prescriptions   departr

☐ Other (please specify)

```
[                                                    ]
```

37. Which of these problems prevented you or your family member from getting the necessary health care? You can choose as many of these as you need to.

☐ No health insurance.

☐ Insurance didn't cover what I/we needed.

☐ My/our share of the cost (deductible/co-pay) was too high.

- [ ] Doctor would not take my/our insurance or Medicaid.

- [ ] Hospital would not take my/our insurance.

- [ ] Pharmacy would not take my/our insurance or Medicaid.

- [ ] Dentist would not take my/our insurance or Medicaid.

- [ ] No way to get there.

- [ ] Didn't know where to go.

- [ ] Couldn't get an appointment.

- [ ] The wait was too long.

- [ ] The provider denied me care or treated me in a discriminatory manner because of my

HIV status, or because I am an LGBT individual.

38. In what county are most of the medical providers you visit located? *(Choose only one.)*

39. In the previous 12 months, were you ever worried about whether your family's food would run out before you got money to buy more? *(Choose only one.)*

☐ Yes

☐ No

☐ Don't know/not sure

40. If a friend or family member needed counseling for a mental health or a drug/alcohol abuse problem, who is the first person you would tell them to talk to? *(Choose only one.)*

☐ Private counselor or therapist   ☐ Don't know

☐ Support group (e.g., AA. Al-Anon)   ☐ Doctor

☐ School counselor   ☐ Pastor/Minister/Clergy

☐ Other (please specify)

```

```

41. Does your household have working smoke and carbon monoxide detectors? *(Choose only one.)*

☐ Yes, smoke detectors only

☐ Yes, both

☐ Don't know/not sure

☐ Yes, carbon monoxide detectors only

☐ No

42. Does your family have a basic emergency supply kit? (These kits include water, non-perishable food, any necessary prescriptions, first aid supplies, flashlight and batteries, non-electric can opener, blanket, etc.)

☐ Yes

☐ No

☐ Don't know/not sure

If yes, how many days do you have supplies for? (Write number of days)

☐

43. What would be your main way of getting information from authorities in a large-scale disaster or emergency? *(Check only one.)*

☐ Television   ☐ Social networking site

☐ Radio   ☐ Neighbors

☐ Internet   ☐ Family

☐ Telephone (landline)   ☐ Text message (emergency alert

☐ Cell Phone   system)

☐ Print media (ex: newspaper)   ☐ Don't know/not sure

☐   Other (please specify)

```

The next set of questions are general questions about you, which will only be reported as a summary of all answers given by survey participants. Your answers will remain anonymous.

46. How old are you? *(Choose only one.)*

☐ 15-19   ☐ 40-44   ☐ 65-69

☐ 20-24   ☐ 45-49   ☐ 70-74

☐ 25-29   ☐ 50-54   ☐ 75-79

☐ 30-34   ☐ 55-59   ☐ 80-84

☐ 35-39   ☐ 60-64   ☐ 85 or older

47. What is your gender? *(Choose only one.)*

☐ Male

☐ Female

☐ Transgender

☐ Gender non-conforming

☐ Other

48. Are you of Hispanic, Latino, or Spanish origin? *(Choose only one).*

☐ I am not of Hispanic, Latino or Spanish origin

☐ Mexican, Mexican American, or Chicano

☐ Puerto Rican

☐ Cuban or Cuban American

☐ Other Hispanic or Latino (please specify)

49. What is your race? *(Choose only one).*

- [ ] White or Caucasian
- [ ] Black or African American
- [ ] American Indian or Alaska Native
- [ ] Asian Indian
- [ ] Other Asian including Japanese, Chinese, Korean, Vietnamese, and Filipino/a
- [ ] Other Pacific Islander including Native Hawaiian, Samoan, Guamanian/Chamorro
- [ ] Other race not listed here (please specify)

50. Is English the primary language spoken in your home? *(Choose only one.)*

- [ ] Yes
- [ ] No. If no, please specify the primary language spoken in your home.

51. What is your marital status? *(Choose only one.)*

- [ ] Never married/single
- [ ] Married
- [ ] Unmarried partner
- [ ] Divorced
- [ ] Widowed
- [ ] Separated

☐   Other (please specify)

52. Select the highest level of education you have achieved. *(Choose only one.)*

☐ Less than 9th grade

☐ 9-12th grade, no diploma

☐ High School graduate (or GED/equivalent)

☐ Associate's Degree or Vocational Training

☐ Some college (no degree)

☐ Bachelor's degree

☐ Graduate or professional degree

☐ Other (please specify)

```
[                                                                    ]
[                                                                    ]
[                                                                    ]
```

53. What was your total household income last year, before taxes? *(Choose only one.)*

☐ Less than $10,000   ☐ $35,000 to $49,999

☐ $10,000 to $14,999   ☐ $50,000 to $74,999

☐ $15,000 to $24,999   ☐ $75,000 to $99,999

☐ $25,000 to $34,999   ☐ $100,000 or more

54. Enter the number of individuals in your household (including yourself).

```
[                                      ]
[                                      ]
```

55. What is your employment status? *(Check all that apply.)*

☐ Employed full-time   ☐ Arr

☐ Employed part-time   ☐ Dis

☐ Retired   ☐ Stu

☐   Homemaker

☐   Self-employed

☐   Unemployed for 1 year or less

☐   Unemployed for more than 1 year

56. Do you have access to the Internet at home (including broadband, wifi, dial-up or cellular data)? *(Choose only one.)*

	Yes
	No
	Don't know/not sure

57. (Optional) Is there anything else you would like us to know about your community? Please feel free to tell us below.

Thank you for your time and participation!

If you have questions about this survey, please contact us at will.broughton@foundationhli.org.

Encuesta de salud de la comunidad del Este de Carolina del Norte 2018

¡Bienvenido a la encuesta de salud comunitaria para el Este de Carolina del Norte!

Estamos llevando a cabo una evaluación de salud comunitaria para su condado. Esta evaluación está siendo realizada por una asociación de 33 condados, hospitales, sistemas de salud y departamentos de salud en el Este de Carolina del Norte. Esta evaluación les permite a estos socios comprender mejor el estado de salud y las necesidades de la comunidad a la que sirven y utilizar el conocimiento adquirido para implementar programas que beneficiarán a esta comunidad.

Podemos entender mejor las necesidades de la comunidad reuniendo las voces de los miembros de su comunidad. Esta evaluación permite que los miembros de la comunidad como usted, nos cuente sobre lo que considera son asuntos importantes para su comunidad. De ante mano le agradecemos por los 20 minutos que tomará completar esta encuesta de 57 preguntas. Sus respuestas a estas preguntas se mantendrán confidenciales y anónimas.

¡Muchas gracias por su aporte y su tiempo! Si tiene preguntas sobre esta encuesta, puede enviar un correo electrónico a Will Broughton en will.broughton@foundationhli.org.

PARTE 1: Calidad de vida

Primero, cuéntanos un poco sobre usted:

3. ¿Dónde vive actualmente?

Código postal

4. ¿En qué condado vive?

☐	Beaufort	☐	Franklin	☐	Onslow
☐	Bertie	☐	Gates	☐	Pamlico

☐	Cumberland	☐	Hyde	☐	Sampson
☐	Currituck	☐	Johnston	☐	Tyrrell
☐	Dare	☐	Lenoir	☐	Washington
☐	Duplin	☐	Martin	☐	Wayne
☐	Edgecombe	☐	Nash	☐	Wilson

Mapa del condado de Carolina del Norte
3. Piense en el condado en el que vive. Por favor díganos si está "totalmente en desacuerdo", "en desacuerdo", "neutral", "de acuerdo" o "muy de acuerdo" con cada una de las siguientes 9 declaraciones.

Declaración	Muy en desacuerdo	En desacuerdo	Neutral	De acuerdo	Muy de acuerdo
Hay una buena atención médica en mi condado.	☐	☐	☐	☐	☐
Este condado es un buen lugar para criar niños.	☐	☐	☐	☐	☐
Este condado es un buen lugar para envejecer.	☐	☐	☐	☐	☐
Hay buenas oportunidades económicas en este condado.	☐	☐	☐	☐	☐
Este condado es un lugar seguro para vivir.	☐	☐	☐	☐	☐
Hay mucha ayuda para las personas durante los momentos de necesidad en este condado.	☐	☐	☐	☐	☐
Hay viviendas accesibles que satisfacen mis necesidades en este condado.	☐	☐	☐	☐	☐
Hay buenos parques e instalaciones de recreación en este condado.	☐	☐	☐	☐	☐
Es fácil adquirir comidas saludables en este condado.	☐	☐	☐	☐	☐

La siguiente serie de preguntas le preguntará sobre problemas y servicios de la comunidad que son importantes para usted. Recuerde que sus respuestas son privadas y no serán relacionadas con usted en ninguna manera.

4. Mire esta lista de problemas de la comunidad. En su opinión, ¿qué problema afecta más la calidad de vida en este condado? *(Elija solo una respuesta)*

☐ Contaminación (aire, agua, tierra)	☐ Discriminación / racismo	☐ Violencia doméstica
☐ Abandono de la escuela	☐ Falta de apoyo de la comunidad	☐ Delito violento (asesinato, asalto)
☐ Bajos ingresos / pobreza	☐ Drogas (Abuso de sustancias)	☐ Robo
☐ Falta de hogar	☐ Descuido y abuso	☐ Violación / agresión sexual
☐ Falta de un seguro de salud adecuado	☐ Maltrato a personas mayores	
☐ Desesperación	☐ Abuso infantil	
☐ Otros (especificar)		

_____

5. En su opinión, ¿cuál de los siguientes servicios necesita la mayor mejoría en su vecindario o comunidad? *(Por favor elija solo uno)*

☐ Control Animal

☐ Opciones de cuidado infantil

☐ Opciones de cuidado para ancianos

☐ Servicios para personas con discapacidad

☐ Servicios de salud más accesibles

☐ Mejores y más opciones de alimentos saludables

☐ Más accesibilidad / mejores vivienda

☐ Otros (especificar)

☐ Número de proveedores de atención médica

☐ Servicios de salud apropiados de acuerdo a su cultura

☐ Consejería / salud mental / grupos de apoyo

☐ Mejores y más instalaciones recreativas (parques, senderos, centros comunitarios)

☐ Actividades familiares saludables

☐ Actividades positivas para adolescentes

☐ Opciones de transporte

☐ Disponibilidad de empleo

☐ Empleos mejor pagados

☐ Mantenimiento de carreteras

☐ Carreteras seguras

☐ Ninguna

PARTE 3: Información de salud

Ahora nos gustaría saber un poco más sobre dónde usted obtiene información de salud.

6. En su opinión, ¿sobre qué área de salud necesitan más información las personas de su comunidad? *(Por favor sugiera solo uno)*

☐ Comer bien / nutrición

☐ Ejercicio

☐ Manejo del peso

☐ Ir a un dentista para chequeos / cuidado preventivo

☐ Ir al médico para chequeos y exámenes anuales

☐ Obtener cuidado prenatal durante el embarazo

☐ Recibir vacunas contra la gripe y otras vacunas

☐ Prepararse para una emergencia / desastre

☐ Usar asientos de seguridad para niños

☐ Usar cinturones de seguridad

☐ Conducir cuidadosamente

☐ Dejar de fumar / prevención del uso de tabaco

☐ Cuidado de niños / crianza

☐ Cuidado de ancianos

☐ Cuidado de miembros de familia con necesidades especiales o discapacidades

☐ Prevención del embarazo y enfermedades de transmisión sexual (sexo seguro)

☐ Prevención del abuso de sustancias (por ejemplo, drogas y alcohol)

☐ Prevención del suicidio

☐ Manejo del estrés

☐ Control de la ira/enojo

☐ Prevención de violencia doméstica

☐ Prevención del crimen

☐ Violación / prevención de abuso sexual

☐ Ninguna

☐ Otros (especificar)

```
[                                    ]
[                                    ]
[                                    ]
```

7. De dónde saca la mayor parte de su información relacionada con la salud? *(Por favor elija solo una respuesta)*

☐ Amigos y familia

☐ Doctor /

enfermera

☐ Farmacéutico

☐ Iglesia

☐ Internet

☐ Otros (especificar)

☐ La escuela de mi

hijo

☐ Hospital

☐ Departamento de

salud

☐ Empleador

☐ Líneas telefónicas

de ayuda

☐ Libros / revistas

```
[                                    ]
[                                    ]
[                                    ]
```

8. ¿De qué temas o enfermedades de salud le gustaría aprender más?

```
[                                    ]
[                                    ]
[                                    ]
```

9. ¿Cuida de un pariente anciano en su casa o en otra casa? (*Elija solo una*).

☐ Sí

☐ No

10. ¿Tiene hijos entre las edades de 9 y 19 de los cuales usted es el guardián? (Incluye hijastros, nietos u otros parientes). (*Elija solo una*).

☐ Sí

☐ No   *(Si su respuesta es No, salte a la pregunta numero 12)*

11. ¿Cuáles de los siguientes temas de salud cree que sus hijos necesitan más información? *(Seleccione todas las opciones que corresponden).*

☐ Higiene dental

☐ Nutrición

☐ Trastornos de la alimentación

☐ Ejercicios

☐ Manejo del asma

☐ Manejo de la diabetes

☐ Tabaco

☐ ETS (enfermedades de transmisión sexual)

☐ Relación sexual

☐ Alcohol

☐ Abuso de drogas

☐ Manejo imprudente / exceso de velocidad

☐ Problemas de salud mental

☐ Prevención del suicidio

☐ Otros (especificar)

Las siguientes preguntas son sobre su salud personal. Recuerde, las respuestas que brinde para esta encuesta no serán ligadas con usted de ninguna manera.

12. En general, diría que su salud es... *(Elija solo una).*

☐ Excelente

☐ Muy buena

☐ Buena

☐ Justa

☐ Pobre

☐ No sé / no estoy seguro

13. ¿Alguna vez un médico, enfermera u otro profesional de la salud le dijo que tiene alguna de las siguientes condiciones de salud?

	Sí	No	No lo sé
Asma	☐	☐	☐
Depresión o ansiedad	☐	☐	☐
Alta presión sanguínea	☐	☐	☐
Colesterol alto	☐	☐	☐
Diabetes (no durante el embarazo)	☐	☐	☐
Osteoporosis	☐	☐	☐
Sobrepeso / obesidad	☐	☐	☐
Angina / enfermedad cardíaca	☐	☐	☐
Cáncer	☐	☐	☐

14. ¿Cuál de los siguientes servicios preventivos ha tenido usted en los últimos 12 meses? *(Seleccione todas las opciones que corresponden).*

☐ Mamografía

☐ Examen de cáncer de próstata

☐ Examen de colon / recto

☐ Control de azúcar en la sangre

☐ Examen de Colesterol

☐ Examen de audición (escucha)

☐ Prueba de densidad de los huesos

☐ Examen físico

☐ Prueba de Papanicolaou

☐ Vacuna contra la gripe

☐ Control de la presión arterial

☐ Pruebas de cáncer de piel

☐ Examen de la vista

☐ Evaluación cardiovascular (el corazón)

☐ Limpieza dental / radiografías

☐ Ninguna de las anteriores

15. ¿Cuánto tiempo hace desde la última vez que visitó a un dentista o clínica dental por algún motivo? Incluya visitas a especialistas dentales, como ortodoncista. *(Elija solo una).*

☐ En el último año (en los últimos 12 meses)

☐ Hace 2 (más de un año pero menos de dos años)

☐ Hace más de 5 años (más de 2 años pero menos de 5 años)

☐ No sé / no estoy seguro

☐ Nunca

16. En los últimos 30 días, ¿ha habido algún día que se ha sentido triste o preocupado y le haya impedido realizar sus actividades normales? *(Elija solo una).*

☐ Sí

☐ No

☐ No sé / no estoy seguro

17. La siguiente pregunta es sobre el alcohol. Un trago es equivalente a una cerveza de 12 onzas, una copa de vino de 5 onzas o una bebida con un trago de licor.

Considerando todos los tipos de bebidas alcohólicas, ¿cuántas veces durante los últimos 30 días tomó 5 o más bebidas (si es hombre) o 4 o más bebidas (si es mujer) en una ocasión?

☐ 0	☐ 4	☐ 8	☐ 12	☐ 16	☐ 20	☐ 24	☐ 28
☐ 1	☐ 5	☐ 9	☐ 13	☐ 17	☐ 21	☐ 25	☐ 29
☐ 2	☐ 6	☐ 10	☐ 14	☐ 18	☐ 22	☐ 26	☐ 30
☐ 3	☐ 7	☐ 11	☐ 15	☐ 19	☐ 23	☐ 27	

☐ No sé / no estoy seguro

18. Ahora le vamos a hacer una pregunta sobre el uso de drogas. Las respuestas que nos dan las personas sobre su uso de drogas son importantes para comprender los problemas de salud en el condado. Sabemos que esta información es personal, pero recuerde que sus respuestas se mantendrán confidenciales.

¿Has usado alguna droga ilegal en los últimos 30 días? Cuando decimos drogas, incluimos marihuana, cocaína, crack, heroína o cualquier otra sustancia ilegal. ¿Aproximadamente cuántos días has usado una de estas drogas ilegales? *(Elija solo una).*

☐ 0	☐ 4	☐ 8	☐ 12	☐ 16	☐ 20	☐ 24	☐ 28
☐ 1	☐ 5	☐ 9	☐ 13	☐ 17	☐ 21	☐ 25	☐ 29

☐ 3	☐ 7	☐ 11	☐ 15	☐ 19	☐ 23	☐ 27	

☐ No sé / no estoy seguro

21. La siguiente pregunta se relaciona con la salud de una persona que ha servido en las fuerzas Armadas. ¿Alguna vez ha estado en servicio activo en las Fuerzas Armadas de los Estados Unidos (Sin incluir el servicio activo de solo entrenamientos en las Reservas o la Guardia Nacional)? *(Elija solo una).*

☐ Sí

☐ No   *(Si su respuesta es No, salte a la pregunta numero 23)*

22. ¿Alguna vez un médico u otro profesional de la salud le ha dicho que tiene depresión, ansiedad o trastorno por estrés postraumático (TEPT)? *(Elija solo una).*

☐ Sí

☐   No

23. Ahora nos gustaría saber sobre su estado físico. Durante una semana normal, aparte de su trabajo habitual, ¿realiza alguna actividad física o ejercicio que dure al menos media hora? *(Elija solo una).*

☐   Sí

☐   No   *(Si su respuesta es No, salte a la pregunta numero 26)*

☐   No sé / no estoy seguro   *(Si su respuesta es No se / no estoy seguro, salte a la pregunta numero 26)*

24. Como dijo que sí, ¿cuántas veces hace ejercicio o se involucra en alguna actividad física durante una semana normal?

☐

25. ¿A dónde va a hacer ejercicio o participa en actividad físicas? *(Marque todas las que corresponden).*

☐ YMCA		☐ Sitio de trabajo / Empleador
☐ Parque		☐ Terrenos escolares / instalaciones
☐ Centro de Recreación Pública		☐ Casa
☐ Gimnasio privado		☐ Iglesia
☐ Otros (especificar)		

Como su respuesta fue Si a la pregunta 23 (actividad física / ejercicio), salte a la pregunta numero 27

26. Ya que dijo "no", ¿cuáles son las razones por las que no hace ejercicio por media hora durante una semana normal? Puedes dar tantos de estos motivos como necesite.

☐ Mi trabajo es trabajo físico o trabajo duro

☐ El ejercicio no es importante para mí.

☐ No tengo acceso a una instalación que tenga las cosas que necesito, como una piscina, un campo de golf o una pista.

☐ No tengo suficiente tiempo para hacer ejercicio.

☐ Necesitaría cuidado de niños y no lo tengo.

☐ No sé cómo encontrar compañeros de ejercicio.

☐ No me gusta hacer ejercicio

☐ Me cuesta mucho hacer ejercicio.

☐ Otros (especificar)

☐ No hay un lugar seguro para hacer ejercicio.

☐ Necesito transporte y no lo tengo.

☐ Estoy demasiado cansado para hacer ejercicio.

☐ Estoy físicamente deshabilitado.

☐ No lo sé.

27. Sin contar ensalada de lechuga o productos de papa como papas fritas, piense en la frecuencia con la que come frutas y verduras en una semana normal.

¿Cuántas tazas por semana de frutas y vegetales dirías que comes? *(Una manzana o 12 zanahorias pequeñas equivalen a una taza).*

Cantidad de tazas de fruta

Número de tazas de verduras

Cantidad de tazas de jugo de fruta 100%

28. ¿Alguna vez estuvo expuesto al humo del cigarro de alguien que fumó cerca de usted durante el último año? *(Elija solo una).*

☐ Sí

☐ No   *(Si su respuesta es No, salte a la pregunta numero 30)*

☐ No sé / no estoy seguro   *(Si su respuesta es No se / no estoy seguro, salte a la pregunta numero 30)*

29. En caso afirmativo, ¿dónde cree que está expuesto al humo de segunda mano con mayor frecuencia? *(Marque solo uno)*

☐ Casa

☐ Lugar de trabajo

☐ Hospitales

☐ Restaurantes

☐ Colegio

☐ No estoy expuesto al humo de segunda mano.

☐ Otros (especificar)

30. ¿Actualmente usa algún producto que contiene tabaco? (Esto incluye cigarros, cigarros electrónicos, masticar tabaco o cigarro de vapor.) *(Elija solo una).*

☐ Sí

☐ No   *(Si su respuesta es No, salte a la pregunta numero 32)*

31. En caso afirmativo, ¿a dónde iría en busca de ayuda si quisiera dejar de fumar? *(Elija solo una).*

☐ QUITLINE NC (ayuda por teléfono)   ☐ Departamento de salud

☐ Doctor   ☐ No lo sé

☐ Farmacia   ☐ No aplica; No quiero renunciar

☐ Consejero / terapeuta privado

☐ Otros (especificar)

32. Ahora le haremos preguntas sobre sus vacunas personales contra la gripe. Una vacuna contra la influenza / gripe puede ser una "inyección contra la gripe" inyectada en su brazo o también el espray "FluMist" que se rocía en su nariz. Durante los últimos 12 meses, ¿se vacunó contra la gripe o se puso el espray "FluMist? *(Elija solo una).*

☐ Sí, vacuna contra la gripe

☐ Sí, FluMist

☐ Si ambos

☐ No

☐ No sé / no estoy seguro

33. ¿A dónde va más a menudo cuando está enfermo? *(Elija solo uno)*

☐ Oficina del doctor   ☐ Clínica Médica

☐ Departamento de salud   ☐ Centro de cuidado urgente

☐ Hospital

☐ Otros (especificar)

```

```

34. ¿Tiene alguno de los siguientes tipos de seguro de salud o cobertura de atención médica? *(Elija todos los que aplique)*

☐ Seguro de salud que mi empleador proporciona

☐ Seguro de salud que proporciona el empleador de mi cónyuge

☐ Seguro de salud que mi escuela proporciona

☐ Seguro de salud que proporciona mi padre o el empleador de mis padres

☐ Seguro de salud que compré

☐ Seguro de salud a través del Mercado de Seguros Médicos (Obamacare)

☐ Seguro Militar, Tricare o él VA

☐ Seguro de enfermedad

☐ Seguro médico del estado

☐ Sin plan de salud de ningún tipo

35. En los últimos 12 meses, ¿tuvo problemas para obtener la atención médica que necesitaba para usted o para un familiar de cualquier tipo de proveedor de atención médica, dentista, farmacia u otro centro? *(Elija solo uno)*

☐ Sí

☐ No   *(Si su respuesta es No, salte a la pregunta numero 38)*

☐ No sé / no estoy seguro

36. Dado que usted dijo "sí", ¿Con cual tipo de proveedor o institución tuvo problemas para obtener atención médica? Puede elegir tantos de estos como necesite.

☐ Dentista   ☐

☐ Médico general   ☐

☐ Cuidado de los ojos / optometrista / oftalmólogo   de salu

☐ Farmacia / recetas médicas   ☐

☐ Pediatra

☐ Otros (especificar)

37. ¿Cuáles de estos problemas le impidieron a usted o a su familiar obtener la atención médica necesaria? Puede elegir tantos de estos como necesite.

☐ No tiene seguro medico

☐ El seguro no cubría lo que necesitaba

☐ El costo del deducible del seguro era demasiado alto

☐ El doctor no aceptaba el seguro ni el Medicaid.

☐ El hospital no aceptaba el seguro.

☐ La farmacia no aceptaba el seguro ni el Medicaid.

☐ El dentista no aceptaba el seguro ni el Medicaid.

☐ No tengo ninguna manera de llegar allí.

☐ No sabía a dónde ir.

☐ No pude conseguir una cita.

☐ La espera fue demasiado larga.

☐ El proveedor me negó atención o me trató de manera discriminatoria debido a mi

estado de VIH, o porque soy lesbiana, gay, bisexual o trangenero.

38. ¿En qué condado se encuentra la mayoría de los proveedores médicos que visita? *(Elija solo uno)*

☐ Beaufort

☐ Bertie

☐ Bladen

☐ Brunswick

☐ Camden

☐ Carteret

☐ Chowan

☐ Columbus

☐ Craven

☐ Cumberland

☐ Currituck

☐ Tyrrell

☐ Vance

☐ Wake

☐ Warren

☐ Otros (especificar)

<div style="border:1px solid black; height:150px;"></div>

Mapa del condado de Carolina del Norte
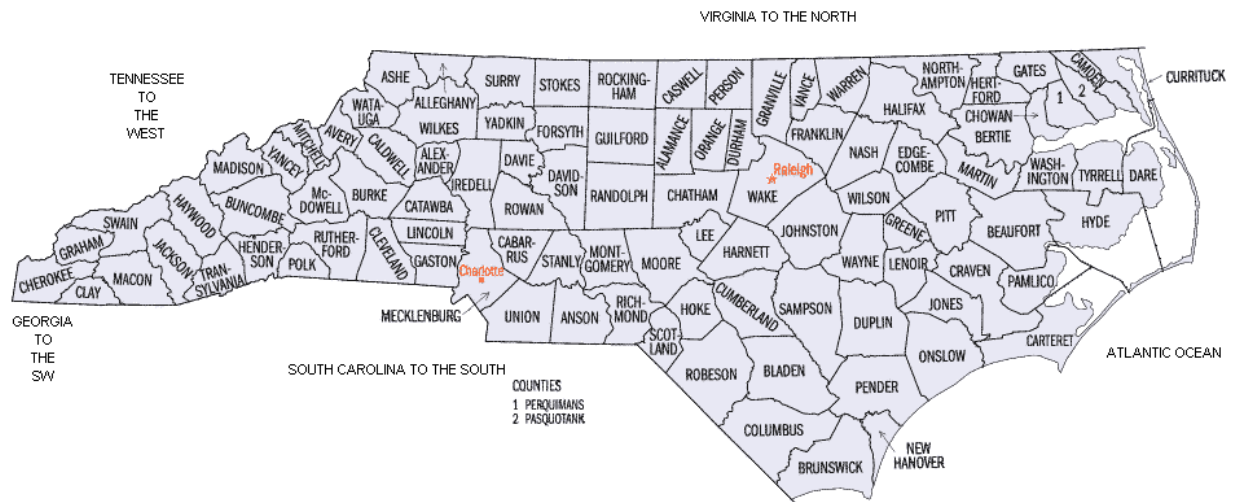

39. En los últimos 12 meses, ¿alguna vez le preocupó saber si la comida de su familia se agotaría antes de obtener dinero para comprar más? *(Elija solo uno)*

☐ Sí

☐ No

☐ No sé / no estoy seguro

40. Si un amigo o miembro de la familia necesita asesoría para un problema de salud mental o de abuso de drogas o alcohol, ¿quién es la primera persona con la que les diría que hablen? (Elija solo uno)

☐ Consejero o terapeuta privado   ☐ No sé

☐ Grupo de apoyo   ☐ Doctor

☐ Consejero de la escuela   ☐ Pastor o funcionario religioso

☐ Otros (especificar)

PARTE 6: Preparación para emergencias

41. ¿Tiene en su hogar detectores de humo y monóxido de carbono en funcionamiento? *(Elija solo uno)*

☐ Sí, solo detectores de humo

☐ Si ambos

☐ No sé / no estoy seguro

☐ Sí, sólo detectores de monóxido de carbono

☐ No

42. ¿Su familia tiene un kit básico de suministros de emergencia? (Estos kits incluyen agua, alimentos no perecederos, cualquier receta necesaria, suministros de primeros auxilios, linterna y baterías, abrelatas no eléctrico, cobijas, etc.)

☐ Sí

☐ No

☐ No sé / no estoy seguro

En caso que sí, ¿cuántos días tiene suministros? (Escriba el número de días)

☐

43. ¿Cuál sería su forma principal de obtener información de las autoridades en un desastre o emergencia a gran escala? *(Marque solo uno)*

☐ Televisión   ☐ Sitio de red social

☐ Radio   ☐ Vecinos

☐ Internet   ☐ Familia

☐ Línea de teléfono en casa   ☐ Mensaje de texto (sistema de alerta

☐ Teléfono celular   de emergencia)

☐ Medios impresos (periódico)   ☐ No sé / no estoy seguro

☐ Otros (especificar)

☐

44. Si las autoridades públicas anunciaran una evacuación obligatoria de su vecindario o comunidad debido a un desastre a gran escala o una emergencia, ¿Ustedes evacuarían? *(Elija solo uno)*

☐ Sí   *(Si su respuesta es Sí, salte a la pregunta numero 46)*

☐ No

☐ No sé / no estoy seguro

45. ¿Cuál sería la razón principal por la que no evacuaría si le pidieran que lo hiciera? *(Marque solo uno)*

☐ Falta de transporte

☐ La falta de confianza en los

funcionarios públicos

☐ Preocupación por dejar atrás la

propiedad

☐ Preocupación por la seguridad

personal

☐ Otros (especificar)

☐ Preocupación por la seguridad

familiar

☐ Preocupación por dejar mascotas

☐ Preocupación por los atascos de

tráfico y la imposibilidad de salir

☐ Problemas de salud (no se

pudieron mover)

☐ No sé / no estoy seguro

PARTE 7: Preguntas demográficas

La siguiente serie de preguntas son preguntas generales sobre usted, que solo se informarán como un resumen de todas las respuestas dadas por los participantes de la encuesta. Tus respuestas permanecerán en el anonimato.

46. ¿Qué edad tiene? *(Elija solo uno)*

☐ 15-19	☐ 40-44	☐ 65-69
☐ 20-24	☐ 45-49	☐ 70-74
☐ 25-29	☐ 50-54	☐ 75-79
☐ 30-34	☐ 55-59	☐ 80-84
☐ 35-39	☐ 60-64	☐ 85 o más

47. ¿Cuál es tu género? *(Elija solo uno)*

☐ Masculino

☐ Femenino

☐ Transgénero

☐ Género no conforme

☐ Otro

48. ¿Eres de origen hispano, latino o español? *(Elija solo uno)*

☐ No soy de origen hispano, latino o español

☐ Mexicano, mexicoamericano o chicano

☐ Puertorriqueño

☐ Cubano o cubano americano

☐ Otro - hispano o latino (por favor especifique)

49. ¿Cuál es su raza? *(Elija solo uno)*

☐ Blanco

☐ Negro o Afroamericano

☐ Indio Americano o nativo de Alaska

☐ Indio Asiático

☐ Otros- Asiáticos, incluidos Japonés, Chino, Coreano, Vietnamita y Filipino

☐ Otros isleños del Pacífico, incluidos los nativos de Hawaii, Samoa, Guamanian /

Chamorro

☐ Otra raza no incluida aquí (especifique)

```

```

50. ¿El inglés es el idioma principal que se habla en su hogar? *(Elija solo uno)*

☐ Sí

☐ No. En caso negativo, especifique el idioma principal que se habla en su hogar.

```

```

51. ¿Cuál es tu estado civil? *(Elija solo uno)*

☐ Nunca casado / soltero

☐ Casado

☐ Pareja- soltera

☐ Divorciado

☐ Viudo

☐ Separado

☐ Otros (especificar)

[   ]

52. Seleccione el nivel más alto de educación que ha alcanzado. *(Elija solo uno)*

☐ Menos de 9no grado

☐ 9-12 grado, sin diploma

☐ Graduado de secundaria (o GED / equivalente)

☐ Grado Asociado o Formación Profesional

☐ Un poco de universidad (sin título)

☐ Licenciatura

☐ Licenciado o título profesional

☐ Otros (especificar)

[   ]

53. ¿Cuál fue el ingreso total de su hogar el año pasado, antes de impuestos? *(Elija solo uno)*

☐ Menos de $10,000   ☐ $35,000 a $49,999

☐ $10,000 a $14,999   ☐ $50,000 a $74,999

☐ $15,000 a $24,999   ☐ $75,000 a $99,999

☐ $25,000 a $34,999   ☐ $100,000 o más

54. Ingrese el número de personas en su hogar (incluyéndose a usted)

[   ]

55. ¿Cuál es su estado laboral? *(Seleccione todas las opciones que corresponden).*

☐ Empleado de tiempo completo

☐ Empleado a tiempo parcial

☐ Retirado

☐ Fuerzas Armadas

☐ Discapacitado

56. ¿Tiene acceso al internet es su casa (Esto incluye alta velocidad, wifi, acceso telefónico o datos móviles)? *(Elija solo uno)*

☐ Sí

☐ No

☐ No sé / no estoy seguro

57. (Opcional) ¿Hay algo más que le gustaría que sepamos sobre su comunidad? Por favor, siéntase libre de decirnos a continuación.

¡Gracias por su tiempo y participación!
