

# General Medicine Program

The General Medicine Program uses a team approach to help individuals regain as much function as possible and adapt physically to limitations of their activities.

## Referral information

For more information about the Rehabilitation Center, please give us a call or visit our website.

2100 Stantonsburg Road, PO Box 6028  
Greenville, NC 27835-6028

Referrals can be made by calling toll free 800-219-8850 or 252-847-7649.

252-847-8222 fax

[ECUHealth.org/Rehab](http://ECUHealth.org/Rehab)

The program's unit provides **medical and rehabilitation nursing care 24 hours a day, seven days a week. It is designed to care for the general rehabilitation population.**

### How we can help

Individuals with many different diagnoses are admitted to the program:

- Amputations of the lower extremity (both medical and surgical)
- Generalized deconditioning (both medical and surgical)
- Musculoskeletal impairments (fractures, arthritis, joint replacements)
- Neurologic impairments (multiple sclerosis, neuropathies, amyotrophic lateral sclerosis)
- Stroke
- Debility/deconditioning

Persons in this program may need help with walking, bathing, dressing, controlling bowel or bladder, toileting, communicating, swallowing, thinking, memory and making decisions.

The medical conditions typically managed in this program may include high blood pressure, high cholesterol, diabetes, pain, cardiac disease, respiratory disease, pressure injuries, wounds and/or prevention of deep vein thrombosis. Persons served in this program may have difficulty returning to life activities such as shopping, going to church, sports or other types of recreation and community events.

### Continuum of care

Our center is part of a major academic health system that offers a full range of medical, diagnostic, laboratory, pharmacy and other services on site.

Medical specialists are available for emergency (within one hour), urgent (within four hours) and routine (within 12 hours) consultations. Our diagnostic, laboratory and pharmacy orders are transmitted real time through the hospital electronic system. Regularly scheduled follow-up services are provided through outpatient clinics.

### Team approach

Families are important members of the team. The rehabilitation case manager/social worker will be the main contact person to discuss needs, progress and plans for discharge. He or she will arrange services for follow-up care and help with information about local resources patients and families may need during their stay. Cultural and spiritual beliefs, goals and preferences will be an important part of the plan.

A dedicated interdisciplinary team follows each individual through their rehabilitation program. Treatment team members are available as needed and may include:

- Medical family therapist
- Nutritionist
- Occupational therapist
- Physical therapist
- Recreational therapist
- Rehabilitation case manager/social worker
- Rehabilitation nurse
- Rehabilitation physician
- Speech-language pathologist

Team members, in collaboration with the patients and families, develop a holistic treatment plan that addresses the physical, cognitive,

behavioral, cultural, leisure and educational needs including:

- Activities of daily living
- Bowel and bladder continence
- Communication and cognition
- Community re-entry
- Coping and adjustment to disability
- Family and caregiver training
- Medication management
- Mobility
- Swallowing

Other available services include:

- Audiology
- Aquatic therapy
- Assistive technology
- Language interpreters
- Neuropsychologist/psychologist
- Nutritional services
- Orthotics and prosthetics
- Pastoral services
- Respiratory therapy
- Substance abuse counseling
- Vocational rehabilitation

Education about stroke, amputation and disability adjustment, diabetes and other medical issues may include individual or group sessions, printed material, informal instruction and hands-on practice of skills needed for success following discharge. It is extremely important that families and caretakers participate in training to be prepared to care for their loved one when discharged. Education about prevention of further injury is an important part of the treatment program, particularly for family and caretakers.

### To make a referral

We accept referrals from physicians, case managers, social workers, therapists, other types of health care providers and representatives of the

patient. Referrals are considered on an individual basis, and each potential inpatient is evaluated by a rehabilitation preadmission nurse and a rehabilitation physician prior to admission.

For additional information or to make a referral for inpatient services, contact the Rehabilitation Center's Admissions Department between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, toll free 800-219-8850 or 252-847-4345.

### General admission criteria

Persons admitted to the center must meet the following general criteria:

- Be at least 18 years old or an emancipated minor
- Be able to participate in at least three hours of therapy per day, five days per week
- Have medical and nursing needs that require an inpatient admission
- Have two or more limited functions that require a planned program with an interdisciplinary team approach
- Have potential functional and cognitive recovery
- Have the support and involvement of family

Persons with the following conditions are not eligible for admission:

- Cardiac or hemodynamic monitoring required
- Primary diagnosis of alcohol or other substance abuse
- Psychiatric disorder that prevents the person from taking part in a rehabilitation program

### Continuing stay criteria

To continue a successful inpatient rehabilitation program, persons served must:

- Continue to have medical and nursing needs that require an inpatient stay
- Be participating in three hours of therapy daily
- Be demonstrating progress in the therapy program

### Transition and discharge criteria

An individual will be discharged when one or more of the following happens:

- Needs can be best served and resources will be conserved at another level of care
- 24-hour medical care is no longer needed
- Discharge goals have been met; there is no further demonstrated improvement with therapy
- Cannot participate in three hours of therapy per day
- Chooses not to participate in the program

### Whom did we serve?

#### General Medicine Rehabilitation Program | 10/1/2020 – 9/30/2021

	Orthopedic conditions	Debility/deconditioning	Other conditions	Amputations of lower extremity
Number of persons served	162	241	79	62
Average age	60.79	66.34	67.86	61.68
Average number of days in rehabilitation	10.81	11.10	11.07	13.06
Average number of therapy hours per day	3.17	3.14	3.15	3.17
Average number of therapy days per treatment week	5.12	5.19	5.38	5.27
Where patients went at discharge				
Community	85.19%	79.25%	79.75%	85.48%
Skilled nursing facility	8.02%	6.22%	6.33%	3.23%
Return to hospital	6.79%	13.69%	13.92%	11.29%
Other		0.84%		
Unplanned transfers to acute medical facilities: 13.41%				
Patient satisfaction with rehabilitation program	95.61% of our patients reported they would recommend this program to a friend or family.			

### Financial arrangements and referrals

We accept any type of funding including Medicaid and Medicare. We work with insurance providers on a case-by-case basis. No individual is denied admission based on the ability to pay. We will assist individuals with limited financial coverage to identify additional financial resources. A disclosure of fees may be obtained by contacting our Central Billing Office at 252-847-4472.
