Helpful tips

- Use Diagnostic departments for x-rays.
- ECU Health North Hospital is the only location that performs CT DEXA procedures; Anesthesia is not offered at this location.
- Use Ultrasound department for the following Invasive Ultrasounds: biopsy, paracentesis, thoracentesis, and drainages (order under US Written Consult for one of these procedures). Be sure to include any notes, labs, etc. in the order prior to submitting order. After order is placed, call 252-847-4575.
- For VIR procedures, place under US VIR Written Consult and once notes are uploaded and order submitted, call 252-847-9016.
- For pediatric patients that need sedation, upload the P-Day Sedation Referral form and recent office visit note/H&P into the radiology order in CareLink and send to VMC-PEDS MED DAY UNIT. The P-Day Sedation Referral form can be found on our website ECUHealth.org.
- For MRIs needing sedation, a current (within last 30 days) office visit note/H&P is required and must be uploaded into the radiology order in CareLink.
